SCRATCH GUARD

GUARDING YOUR SINKS FROM SCRATCH WITH SCRATCH GUARD

Every space of the home is special and everything inside it is precious. Preserving and saving the beauty of your beautiful Sink, we have a scratch guard!

A thin plastic film over the surface that ensures hassle-free and scratch-free installation. Once you are sure of perfect installation, remove the film and reveal the beauty of your sink to the world!

SUPER DRAIN

DRAIN AWAY YOUR DRAINAGE WORRIES WITH SUPER DRAIN

Now no more worries of kitchen waste or any other waste blocking your drains and clogging your sink. Sinks comes with Super Drain!

A drain pipe that keeps clogging and cockroaches both away, giving you peace and happiness!

CHOKEFREE STRAINER

STAY FREE FROM CHOKING WITH CHOCKFREE STRAINER

1. On a similar line to Super Drain, the choke free-strainer is the perfect solution for choking and clogging the sinks due to kitchen waste.
2. Coming with small holes, the strainer stops small particles to enter the drain pipe. For better and enhanced performance, keep the strainer at an even level with a steel cup. Also if you wish to fill the sink and use it as a water tub to wash utensils in one go, push the strainer down.

UNDERCOAT

COAT YOUR CORROSION WORRIES WITH UNDERCOAT

One of the most important factors or features of a good sink is an undercoat that keeps your sink free from unwanted sound, corrosion, and condensation. Royal Series sinks use premium undercoating spray that keeps them dry and efficiently working for the longest time.

CAREFULLY READ THESE INSTRUCTIONS

1. Read the product guide before using it in combination with stainless steel.
2. Before applying the coat directly on the sink, apply on the little part of the sink which is not going to be seen.

A CLEANING GUIDE TO KEEP YOUR SINK FOREVER SHINING AND STYLISH!

Stainless steel utensils get scratched with a brush or scrubber. Over time, they lose their shine. Thus, clean your Sink with a soft sponge or cloth using soap water. Immediately wipe the sink with a dry cloth after a wash to ensure no stains or marks.

Use only good quality washing and cleaning products to clean the sink for its prolonged good performance.
