

Fully Auto Chapatti Machine

Fully Automatic Chapati Machine – Brother Machine Manufacturers

The Fully Automatic Chapati Machine by Brother Machine Manufacturers is a high-performance solution designed for mass production of chapatis with minimal human intervention. Built with premium stainless steel and advanced automation, this machine is ideal for industrial kitchens, catering units, hotels, hostels, and food service chains requiring speed, consistency, and hygiene.

Key Features:

Fully Automated Process

The entire process is automated for high efficiency.

High Production Capacity

Produces 7000+ chapatis per hour with uniform shape, thickness, and size.

Home-like Quality

Soft, fluffy chapatis with even cooking and authentic taste, just like homemade.

Hygienic & Safe Design

Made from food-grade stainless steel ensuring cleanliness and long-term durability.

Digital Control Panel

Easy-to-use control system for adjusting temperature, speed, and thickness settings.

Energy Efficient & Low Maintenance Designed for low power consumption and easy cleaning, ensuring long-term cost savings.

Continuous Operation

Non-stop chapati making with robust performance and minimal downtime

Production capacity	5000 - 7000/hr
Power consumption	3.75kw/hr
Gas Consumption	10-15kg/hr
Dimensions L*W*H	30ft*3ft*5.5ft
Chapati size	7inch
Chapatti thickness	1mm-1.5mm
Chapati weight	25-30 gram
Price	10,00,000
