About Us

According to current records, the medical equipment business of our country is worth almost \$11 billion. In terms of emerging markets, this market for medical devices is predicted to grow at the greatest rate- a CAGR of 15%, or 2.5 times faster than the global average. With the aim of contributing to this large industry and implementing the latest innovation to promote greater human health, we, Alevanta Health Care, began operations in 2021. We are a Gujarat-based supplier and trader of medical equipment such as Oxygen Mask, IV Set Economy, Cord Clamp and many more products. Hospitals, nursing homes, and private clinics frequently utilize these items because they are long-lasting, simple to maintain, and of the highest quality finish.

Despite being a new name, we focus on enhancing the experience of our customers with the help of a widespread distribution network which allows us to deliver our products to various corners of the country within a short period of time. In addition, we have built a sizable warehouse for product storage, packaging, and delivery. Bulk orders can be stored there while being protected from pests, moisture, and dust. Furthermore, because of our transportation network, we are able to complete the deliveries within the deadlines.

Key Facts

Nature of Business	Manufacturer
Primary Competitive Advantages	urine bags,iv set
No of Staff	10
Year of Establishment	2021
OEM Service Provided	No
