About Us

Our company, Riddance Engineering is a reliable trader and supplier of comprehensive power and electrical solutions, specializing in Panels Projects, DG Projects, Generator Sets, and Industrial DG Projects. We cater to a wide range of industries, commercial establishments, and infrastructure developments by providing dependable products and project-based solutions that ensure uninterrupted power supply and operational efficiency. Our offerings are sourced from trusted manufacturers and comply with industry standards for performance, safety, and durability.

With a strong focus on quality, we support clients from requirement assessment and product selection to supply coordination and project execution assistance. Our Generator Sets and DG project solutions are widely used in factories, hospitals, data centers, residential complexes, and construction sites. Backed by industry knowledge and a customer-centric approach, we emphasize timely delivery, competitive pricing, and transparent business practices. By understanding the specific needs of each project, we deliver customized and cost-effective solutions that meet technical expectations. Our commitment to reliability, service excellence, and long-term partnerships has helped us establish a strong presence as a trusted name in power and electrical project supplies.
