About Us

Milton Chemicals Pvt. Ltd. is a name one can trust when it comes to buying quality chemicals. Began selling and shipping chemicals in the year 1986 from its working space based in Mumbai, Maharashtra (India), today, the company is considered as a reliable Importer, Supplier & Trader of chemicals to be used in industries like chemicals, pharmaceuticals, cosmetics, textiles, paper, mining, cables, plastics, construction chemicals, plywood, pigments, and many more. The company also has gained specialization in providing industrial agricultural chemicals and natural humates. We import Technical Grade Prilled Urea For Industrial Use, Super Absorbent Polymer, and Polyacrylamide from United Arab Emirates. Apart from these chemicals, we export Ferrous Sulphate, Magnesium Sulphate, and Manganese Sulphate to global markets. We also trade Hydrochloric Acid in the Indian market.

The technical grade prilled urea for industrial use, as name suggests, is a solution for the technical grade urea market for industrial applications. This chemical is composed of Nitrogen 46 % min, Biuret 1 % max. and Moisture 0.5 % max. It is available in particle size of 1-3 mm (90 % passes through 1-3 mm sieve) and in colored pp/hdpe bags 50 kgs each. We import and distribute this chemical under the license from Govt. of India, Ministry of Chemicals and Fertilizers. The Polyacrylamide Nonionic, Cationic Polyacrylamide and Anionic Polyacrylamide are three different white solid powder chemicals used as a flocculation agent, for industrial solid-liquid separation process, drinking water purification, municipal sewage sludge, municipal solid waste and industrial effluent.

Key Facts

No of Staff	4
Year of Establishment	1986
OEM Service Provided	No
Memberships	CHEMEXCIL
