ABOUT THE COMPANY

Vivansh Systems delivers the best possible injection molding solutions for our customers. In the most economical, technically advanced, and socially responsible way.

Our mission is to realize and implement the best possible injection molding solutions for our industrial customers

OUR HISTORY

Vivansh Systems is an injection molding manufacturing company with rich experience.

We have amassed a wealth of knowledge over the past 4+ years of operation. Our experience with plastic injection molding is unparalleled.

Our craftsmanship and service is always top quality.

1 2020

In the following years, emphasis was increasingly placed on injection molding activities.

This includes the in-house building of customized plastic injection molds and the mass production of plastic injection molded products.

2 PRESENT

The injection molding is now integrated with an all-round package of service.

Vivansh Systems utilizes state-of-the-art injection molding machinery and a team of highly skilled people to guarantee excellent results.

OUR QUALITY

At Vivansh Systems, quality always comes first. Quality of product, technology, and service. We ensure a high standard of quality is maintained throughout the entire injection molding process, from design through to post-processing and assembly.

Vivansh Systems has an extensive machine park for mold construction and injection molding

One-stop shop for plastic: from design to product with a completed service package and logistics

EXCELLENCE IN PLASTIC

Vivansh Systems is an established producer of precision injection molding parts and logistical services for a wide array of with over 4+ years of experience, we continue to redefine the laws of product development and injection molding production.

Our advanced machines, allow us to create the finest quality injection molding products for a diverse range of markets. Virtually every injection-molded product and process (including tooling of customized molds) can be carried out by us on-site.

OUR KEY FACTORS

At Vivansh Systems we combine the expertise of plastic injection molding experience with state-of-the-art technologies to make your ideas a tangible product.

- **OPTIMIZATION OF DESIGN & PROCESSES**
- **PRODUCT DEVELOPMENT**
- **CUSTOMISED TOOLING FACILITY**
- **CUSTOMER FOCUS**
- **TESTING PROCESS**

OPTIMIZATION OF DESIGN & PROCESS

Vivansh Systems will assist you to create technically feasible designs and regulatory compliant injection molded products for your industry. You will receive advice on injection molding and product development based on industry experience, expert knowledge and a thorough analysis of your idea, design and/or product. We are able to provide you with high-quality finished products while helping you optimize the entire Design-to-Cost (DTC) process to lower overall production costs,

PRODUCT DEVELOPMENT

Strong products start with a strong design. That is why Vivansh Systems offers support throughout the entire product development process. We will help you optimize your idea, design, or product into an injection moldable product. Together we will achieve the best possible results. Vivansh Systems will ensure your product is both technically and economically feasible before any production begins. This enables us to meet the requirements set by you as a customer in terms of aesthetics, strength, stiffness, chemical resistance, and any other specifications

Vivansh Systems will help you determine the most suitable materials to be used during production to produce the highest-quality injection molded products to suit your requirements. We will also streamline the entire injection molding process to provide a reliable service with an optimal cost structure.

- We ensure requirements for functionality and design will be met by conducting feasibility studies before full-scale production begins.*
- We help optimize the product development stages of the plastic injection molding process by providing customers with tailor-made solutions.*

CUSTOMIZED TOOLING FACILITY

At Vivansh Systems, we pride ourselves on our self-sufficiency and control over the production process, thanks to our state-of-the-art in-house tool room. Our tool room is equipped with advanced machinery and technology, enabling us to craft complex molds and tools with utmost accuracy. This vertical integration allows us to:

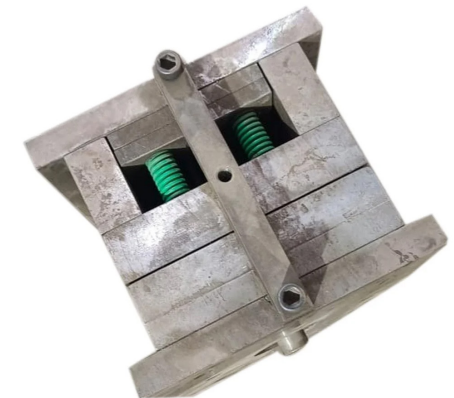

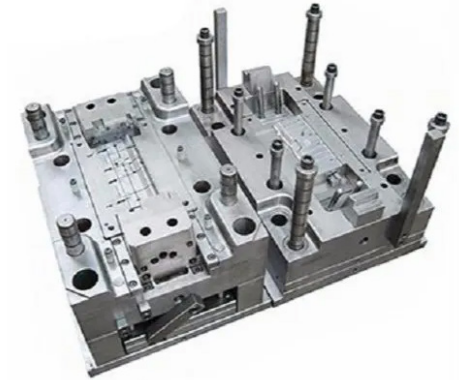

- Exercise total quality control*
- Reduce lead times*
- Enhance design flexibility*
- Maintain confidentiality*
- Drive cost-effectiveness*

From concept to completion, our in-house tool room empowers us to deliver exceptional injection molded products, tailored to our customers' unique needs, with unparalleled speed and reliability."

CUSTOMIZED TOOLING: HIGH QUALITY MOULD

Before we can inject a product, a high- quality mold is needed. This is typically a detailed mold made of metal. Silicon injection molds do exist for certain applications. The materials used during the construction of customized injection molds will depend on the product design and the intended purpose of production. Your product model is converted into a mold design by our mold constructor using the latest 3D software. A 3D representation of the mold will accurately reflect all mold cavities and mold parts. After necessary adjustments are identified and rectified, the production of tailor- made injection molds will begin inside our specialized in-house tool shop

CUSTOMER FOCUS

Vivansh Systems produces a wide range of plastic products for various markets around the globe.

We have years of experience working on multifaceted projects and have obtained the highest degree of certification for plastic injection molding.

A tailor-made injection molding solution exists for all industries, purposes and requirements.

Customized injection molding solutions and high-quality products are what we deliver.

CUSTOMIZED SOLUTIONS & QUALITY

Vivansh Systems have experience producing a wide array of injection-molded products on an industrial scale. Our versatile range of in-house machinery which includes the world's smallest injection molding machine also allows us to produce intricate precision micro-products (with weights of less than 0.03 grams per piece) for use in the electronics and medical industries. We also use our proven knowledge of injection molding for other sectors such as internal transport, rail and infrastructure and traffic technology.

YOUR TRUSTED PARTNER

At Vivansh Systems, we pride ourselves on being a trusted partner to our clients, delivering exceptional quality products that meet and exceed industry standards. Our commitment to quality assurance is unwavering, ensuring every part that leaves our facility is meticulously inspected and tested to guarantee reliability, durability, and performance. Through rigorous quality control processes, cutting-edge technology, and a team of experienced professionals, we ensure that our products consistently meet the highest standards of excellence. Our dedication to quality has earned us long-standing relationships with esteemed clients, and we continue to strive for perfection in every aspect of our production process

OUR MACHINES

OUR MACHINES LIST

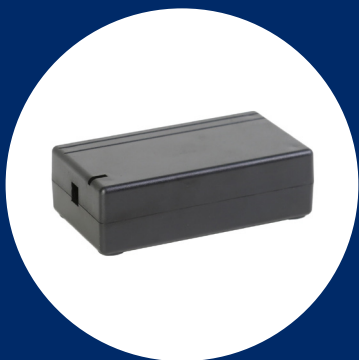

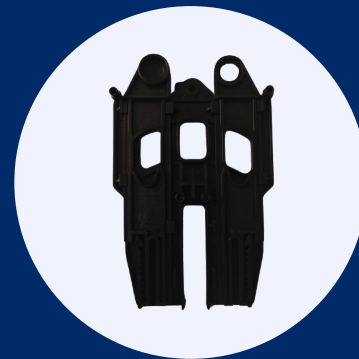

INJECTION MOULDING MACHINES

S.NO	MACHINE	MAKE	SIZE	QTY
1	Injection Moulding	Golden Eagle	560 Ton	1
2	Injection Moulding	SumiTek	350 Ton	1
3	Injection Moulding	Haitian	250 Ton	1
4	Injection Moulding	SumiTek	250 Ton	1
5	Injection Moulding	Clf	250 Ton	1
6	Injection Moulding	Euro Tech	185 Ton	1
7	Injection Moulding	Bole	160 Ton	1
8	Injection Moulding	Euro Tech	155 Ton	1
9	Injection Moulding	Electronica	120 Ton	1
10	Injection Moulding	Euro Tech	100 Ton	3
11	Injection Moulding	Euro Tech	90 Ton	1
12	Injection Moulding	Haitian	250 Ton	1
13	Injection Moulding	Golden Eagle	250 Ton	1
TOTAL				15

TOOL ROOM MACHINES

S.NO	MACHINE	MAKE	SIZE	QTY
1	VMC Machine	STM	1050	1
2	VMC Machine	KAIZEN	850	1
3	EDM	ECOLINE	550	1
4	MILLING MACHINE			1
5	SURFACE GRINDER			2
6	LATHE MACHINE			1
7	DRILL MACHINE			4
TOTAL				11
