About Us

Innovative Powertech specializes in control panel boards design, production and installation work. As an ISO 9001:2015 certified manufacturer and supplier, we ensure that the control panels we offer operate reliably and efficiently over time. We are a dynamic company, which has established itself formally in the year 2022 as a reliable manufacturer and supplier of a wide range of industrial control panel boards such as Control Panel Boards, 5 Main Distribution Board, 8 Power Motor Control Centre, AHU Panel, Auto Main Failure Panel, Fire Fighting MCC Panel, etc. We have a highly skilled and experienced team of engineers who work closely with clients to understand their specific needs and design solutions that meet those needs. We also offer consultation to help clients determine the best approach to managing their electrical systems and optimizing their operations. Our electrical panels are offered in various power ratings and related specifications.

We work with variety of industries, including manufacturing, energy, water treatment, transportation and many others. We offer our products with full quality assurance, ranging from standard off-the-shelf control panels to highly customized solutions that are tailored to the unique requirements of a particular application. We take care of quality and ensure the proper delivery of products within the budget. Our goal is to play a crucial role in helping organizations across a wide range of industries to manage their electrical systems, ensuring safe and reliable operation and optimize performance and productivity.

Operating from Ahmedabad, Gujarat, we, Innovative Powertech is an ISO 9001:2015 certified company involved in producing a range of superior quality control panel boards such as 14 Power Distribution Board, Air Handling Unit Control Panel, DG Synchronization Panel, Feeder Pillar Panel and many more. Established in 2022, we are a young and dynamic manufacturer and supplier with a cohesive team of qualified professionals. Quality is our topmost priority and therefore we inspect everything from the procurement of components to the final delivery of products to our esteemed clients. We also have a well-managed infrastructural facility which is equipped with advanced machinery and tools. We have created a distinction in the industry because we maintain uniformity in our operation, business dealings and customer service.
