

# High Strength High Modulus PVA Fiber

---

Introducing our High Strength High Modulus PVA Fiber, a premium raw filling material manufactured using high-quality polyvinyl material. This fiber is specially designed to offer excellent chemical resistance, superior durability, and enhanced reinforcement performance. Available in 8 mm and 12 mm fiber lengths, it is widely used in concrete reinforcement, composite materials, and textile applications. Its excellent adhesion and easy dispersion properties make it a reliable choice for industrial and construction applications.

Specification	Details
Product Name	High Strength High Modulus PVA Fiber
Material	Polyvinyl Material
Fiber Length	8 mm & 12 mm
Feature	Chemical Resistant
Usage	Concrete Reinforcement, Composites, Textiles
Properties	High Strength & High Modulus
Business Type	Exporter, Manufacturer, Supplier

## FAQs

**Q:** What is High Strength High Modulus PVA Fiber made of?

**A:** It is made from polyvinyl material.

**Q:** What fiber lengths are available?

**A:** 8 mm and 12 mm.

**Q:** What is this product used for?

**A:** Concrete reinforcement, composites, and textiles.

**Q:** What feature does this product offer?

**A:** Chemical-resistant properties.

**Q:** What kind of business offers this product?

**A:** Exporter, manufacturer, and supplier.
