

# Liquid Plasticizer

---

Our Liquid Plasticizer is a high-quality yellow-colored plasticizer widely used across various industries. Manufactured using Di-2-ethylhexyl-phthalate (DEHP), it offers excellent flexibility, durability, and performance enhancement for polymers and resins. The liquid form ensures easy mixing and uniform dispersion in applications.

Specification	Details
Material	Di-2-ethylhexyl-phthalate (DEHP)
Color	Yellow
Density	0.983 – 0.985 g/cm <sup>3</sup>
Tensile Strength	13.4 MPa
Form	Liquid
Applications	PVC cables, flooring, films, adhesives, coatings, sealants

## FAQs

**Q:** What is the density of the Liquid Plasticizer?

**A:** 0.983 – 0.985 g/cm<sup>3</sup>

**Q:** What is the tensile strength?

**A:** 13.4 MPa

**Q:** What material is used?

**A:** Di-2-ethylhexyl-phthalate (DEHP)

**Q:** What industries use this product?

**A:** PVC cables, flooring, films, adhesives, coatings, and sealants
