-  **Eco-Friendly**
Safe inks and processes that are better for the environment.

Product Description

DTF Printing Service is a versatile garment decoration solution for producing vibrant, detailed and durable designs on a wide range of textile products. Designs are digitally printed onto a special transfer film and then heat pressed onto the selected fabric, creating sharp graphics with strong color reproduction and a professional finish.

The service is suitable for custom T shirts, hoodies, uniforms, promotional clothing, team wear, event apparel and personalized merchandise. It is suitable for both small custom orders and bulk production requirements.

Key Features

Specification	Details
Service	Direct-to-Film (DTF) Printing
Print Quality	Detailed, vibrant and sharp graphics
Application	Heat transfer onto suitable textile surfaces
Customization	Artwork, logos, names, text and photographs
Suitable Products	T shirts, hoodies, uniforms, bags and apparel
Order Quantity	Small orders as well as bulk requirements
Use Cases	Fashion, events, promotions, teams and gifting

Benefits

- Bright and detailed custom graphics.
- Suitable for complex artwork and multicolor designs.
- Flexible solution for personalized and promotional apparel.
- Useful for both individual pieces and larger production quantities.
- Professional appearance for fashion, branding and event merchandise.

Applications

Custom T shirts, corporate uniforms, sports and team jerseys, school and college apparel, event merchandise, promotional clothing, personalized gifts, hoodies, tote bags and other compatible textile products.

Ordering Information

Customers can provide their artwork or customization requirements and select the desired garment or fabric product. Print size, placement, quantity and production requirements can be discussed before final production.

Note: Final results can vary depending on fabric type, garment color, artwork quality, transfer settings and washing or care conditions.
