

Industrial Galvanized Steel Coil

Industrial Galvanized Steel Coil is manufactured using premium-quality steel and a protective zinc coating, offering excellent corrosion resistance, durability, and long service life. It is widely used in construction, roofing, cladding, fabrication, ducting, and industrial applications. The coil features a smooth polished surface, high strength, and reliable performance under demanding conditions.

Specification	Details
Usage	Construction
Material	Galvanized Steel
Technique	Cold Rolled
Grade	IS 277 / ASTM A653
Product Type	Galvanized Steel Coil
Thickness	4 mm
Color	Silver
Width	900–1250 mm (customizable)
Coil Weight	3–10 Ton
Surface Treatment	Polishing
Application	Roofing, Cladding, Fabrication, Construction
