## About Us

Alfa Technovac LLP, earlier known as Alfa Engineering Works, is a prestigious company in the markets for Vacuum and Ultra High vacuum components, fittings and vacuum pumps. We produce direct-drive and belt-driven vacuum pumps that fit both the fine and rough vacuum ranges. Apart, we hold expertise at producing diffusion pumping systems for high vacuum requirements. Our products such as Direct Drive High Vacuum Pump, Laboratory Vacuum Pump, Belt Driven Vacuum Pump, Dry Vacuum Pump, Rotary Vacuum Pumps, Liquid Nitrogen Trap, Water Cooled Condenser, SS Vacuum Pump Regulator, Inlet Moisture Trap, and more make us extensively popular in the industry.

In the last one year, our company has expanded into projects outside of vacuum technology, involving designing, fabricating, machining, hydraulics, electro pneumatics, and other difficult engineering abilities. The laser-focused technical staff at our company remains dedicated to offering complete after-sale support solutions right to your door, as well as a comprehensive vacuum solution that includes the selection of the most cost-effective and appropriate vacuum pumps.
