About Us

Tinytech Plants is a well-known company in the market that is working to develop small, simple, decentralized, cheap rural benign technologies for creating self-sufficient and happy villages and communities. This will help the communities to generate income through self-employment rather than relying on corporate centralized production for basic human needs. We are committed to developing home-scale and village-scale industries and tiny power plants to make people autonomous and independent from the clutches of centralized industrial structures and huge transport systems wasting enormous resources. Being a trusted manufacturer and supplier of Commercial Oil Expellers, Groundnut Oil Expellers, Edible Oil Extraction Machines, Oil Filter Press Machines, Automatic Sunflower Oil Mill Plants, and other products, we strive to keep up with the quality and design.

All our products are designed as per the latest requirements of our customers and the industry trends. The raw materials used to develop the products are procured from reliable vendors in the market. Thus, our engineers, designers, and quality controllers work in collaboration, do wonders, and bring forth a unique and desirable product range. Furthermore, we are highly dedicated to contributing to world peace by creating self-sustaining societies and not participating in the madness of depleting the planet's resources by the corporate world.
