

Hongjie Cross Wedge Rolling Machine

The Hongjie Cross Wedge Rolling Machine is designed for high-efficiency production of forged shafts, axle shafts, transmission components, and automotive parts with superior dimensional accuracy and material utilization.

Technical Specifications:

- Billet Diameter: 20–150 mm
- Maximum Rolling Length: 200–1200 mm
- Rolling Speed: 5–30 rpm
- Main Motor Power: 30–250 kW
- Production Capacity: 100–1200 pcs/hour
- Material: Carbon Steel, Alloy Steel, Stainless Steel
- Heating Temperature: 1000–1200°C
- Control System: PLC with Touch Screen
- Power Supply: 380V, 50Hz, 3 Phase
- Lubrication: Automatic Centralized System

Applications: Automotive shafts, steering shafts, transmission shafts, gear shafts, agricultural and industrial forged components.
