*Always With You...*

- Quality lighting is extremely important when it comes to the operating room. We want surgeons to experience improved visualization without an increase in eyestrain and operate at an advantage to both doctor and patient.
- The challenge lies in finding the right surgical lighting that fits operating room staff and the patient's needs.
- Powerful LED Technology helps keeping a coolhead through an almost in existent heat development in the surgeon's head area and wound field. we design compact, effective and versatile for surgeon's use. The lamp shape assures visual comfort and suitable laminar flow.
