Packets with permanent aggressive adhesive, good initial tack and excellent thermal stability suitable for permanent bag sealing application. Available in all sizes. These are used mainly for packing garments, disposable masks and stationery items.

Silver pouches

Silver pouches or Aluminum foil pouches or food parcel pouches are made of metalized polyester laminated with high density poly ethylene. Available in different sizes. These are mainly used by tea companies and restaurants for packaging and deliveries.

Bags which are reusable, re-sealable storage bags of different sizes according to the need by end customers. The seal is tight enough to keep air and moisture out as well as keeping the product within the same bag from falling out. These are pack of 100pcs lock bags used for various household purposes.

Ziplocks

Courier Bags

Messenger bags (also called as courier bags) is a type of sack made of polyester and high density material. The usage for such bags has grown during this lockdown, as many have started their new ventures from home. It is favored for their economical and confidential shipping of various products. A packaging solution to retail, financial-commerce, education, medical health care and pharmaceutical.

Stretch Film

Stretch wrap or stretch film also known as pallet wrap, is a highly stretchable plastic film that is wrapped around items. The elastic recovery keeps the items tightly bound and firm. Best solution to keep the items intact and firm especially at the time of transit.

Air Bubble Roll

Bubble wrap is a pliable transparent plastic material used for packing fragile items. Regularly spaced, protruding air-filled hemispheres (bubbles) provide cushioning for fragile items. Available in different microns.
