About Us

Mexim was established in 1987 and is registered as one of the India leading manufacturers and suppliers of quality proven self adhesive tapes. With a considerable period of time, Mexim has acquired a wide customer base of adhesive tapes in India. We are supplying to more than 2000 clients directly, and more with the help of our wide distributor network.

Established in 1987, Mexim started as a trading firm which was authorized to distribute quality Tapes for Sanghi Polyester in the West-Zone market of the country. Since then, Mexim has grown immensely in terms of market share and also as per new technology we set up our own manufacturing in Daman, in 1995. Within a span of 5 years we moved to bigger premises. We expanded considerably with establishment of a First Floor at our present factory in the year 2008, which not only doubled our space, but also quadrupled our production facility with the inclusion of a modern high-speed coating line. In the year 2014, we started with our first Multi-Purpose coating line, which has facility to coat a series of special types of tapes. We now strive to set-up a facility for the manufacturing of a complete new range of products - Self-Adhesive Bituminous membranes by the end of the year 2016, while simultaneously increasing our present manufacturing to have more technical tapes like Double Side Cloth Tapes, stationery products and special printing facilities.
