## About Us

Safety and efficacy of healthcare products are nonnegotiable factors to consider when buying Pharmaceutical Capsules, Pharmaceutical Syrups, Pharmaceutical Tablets, etc., online. Evaluating safety profiles of different drugs through clinical trials is important as unsafe products can lead to various side effects that can be extremely harmful for the human body. At Vraj Pharma, buyers can confidently purchase a range of efficacious and safe medicines at low cost. All medicines the company markets as a trader and supplier are free from side effects, and do not pose any health hazards if consumed as prescribed by a healthcare professional. Products are always sold in qualitative packaging with detailed labeling and essential safety information provided in each packet.

The company sources branded healthcare supplies from reputable brands, also continuously evaluating their quality through a range of tests. The tests are executed at the company laboratory set up in Ahmedabad, Gujarat. Its team of quality testers assesses potential drug interactions and various parameters before approving medications for sale. Once approved by the team of qualified experts, medicines are marketed all over India using the robust distribution network of the company.

Mr. Vedant Shah established Vraj Pharma in 2022. He knew that he was initiating the business in a field where small to large pharmaceutical companies, biotechnology firms, and other healthcare providers were working hard to find a firm footing. Remaining accountable for the overall decision making of the company and steering it expertly using his business experience and exposure, he managed to take the company to heights of success in just a year. In the future, he wishes to associate with many more companies whose manufacturing businesses are based on cutting-edge research and innovative technologies so that he can make Vraj Pharma a leading name in the medicine trading business.
