

Technical data

PAINT REMOVER

Description:

Paint stripper is formulated to remove old paint film from Steel, Aluminium, Wood etc.

Recommended use:

Excellent paint stripper for stripping old paint from various objects without damaging the original object. This saves a lot of time and labor as this product gives instant results.

Method of Application :

- 1 Sprinkle water on the surface from which the old paint film is removed.
- 2 Give light zig-zag scratches on the paint surface so that the paint remove properly penetrates the paint up to the base .
- 3 Apply paint stripper by brush on the scratched surface .
- 4 For better results specially in summer again sprinkle water on the surface where paint remove is applied.
- 5 Paint film will immediately start pilling off from the surface. After total pilling off paint fill scrap it and wash it with the water properly
- 6 If paint layers are more on the surface repeat the method 1 to 5 again

Product data :

Covering capacity** : 8 – 10 sq mtrs/liter

Coverage may vary depending on the surface and method of application

Viscosity @ 30 deg C : viscous

Sp.Gravity : 1.15 – 1.2
