PH BOOSTER

RO PH BOOSTER is a specially designed of inorganic chemicals with high neutralizing capacities which increases

the pH of the product water from the reverse osmosis system. The product is meant for portable applications

Features:

- ✓ Raise the ph of water boosting alkalinity & neutralizing acidity
- ✓ Balances your body pH levels
- ✓ Makes your water alkaline water
- ✓ Maintain the taste in the permeate water
- ✓ Easy to use products environmental friendly features

GENERAL SPECIFICATIONS:-

pH as such : >10

Specific Gravity : > 1.05

Appearance : colorless liquid

Water solubility : Complete

Direction for use

The PH of RO water will be around 6 to 6.5; we have developed a product to enhance the PH of RO water Suitable for drinking. The Dosage will be depending upon the quality of the RO water. This should be considered very seriously by plants using a process to control pH

SAFETY AND PRECAUTION:

PH BOOSTER is safe but avoid contact with eyes and skin. Do not take internally. Gloves and Goggles should

be used while handling the product.

A material safety data sheet is available on request.

Packaging: Available in 10, 25, 30 kg's Food grade virgin HDPE Containers. Shelf life is 2 years under normal conditions of storage
