About Us

Making it our aim to take a step towards progress and help many others take steps towards positive change too, we, Madhu Industries, established our business in 2021. We are located in Yamunanagar, Haryana, from where we conduct our day to day affairs with unmatched agility and professionalism. Why do we stay agile? Because we know that the needs of our customers vary as they come to us looking for various products like Bamboo Combs, Cotton Earbuds, Plastic Wipers, Premium Shaving Brushes, and Scrub Pads. Some join our journey to experience the quality we offer, some come to us looking for the best product prices, whereas some want hassle free delivery in quick time at a remote location. We are proud to cater to all these needs without letting any customer down.

Our best selling products do not happen overnight. They show how we almost move mountains to embed quality in each product as a trustworthy manufacturer, trader, and supplier. We go scanning major markets for reliable raw material suppliers, be it wood or plastic. We then craft products that are incredibly durable and priced well. For instance, we make wooden products like combs using 100% natural wood. Our combs are then designed for everyone looking for an easy to use, eco-friendly product that not only looks good but last long too. Likewise, we keep quality at the forefront when making our household products like wipers and scrubbers. We ensure that these products are designed for easy use and easy affordability. Today, we are proud of the impact that we have made in business and the way we have touched hundreds of hearts with our work excellence, quality mindfulness, and punctuality.

Madhu Industries began as a product manufacturer two years ago. In this short span of time, we have never rested and have worked day and night refining our original production technologies to create and sell the best range of Bamboo Combs, Cotton Earbuds, Plastic Wipers, Premium Shaving Brushes, and Scrub Pads. The result obtained through grueling work is a comprehensive range of products that is easy to use, qualitative, durable, and affordable.
