**PSA LSQ STICKER ADHESIVE**

**PSA 173 PRESSURE SENSITIVE ADHESIVE**

## About Us

Pressure Sensitive Adhesives and Lamination Adhesives offered by DoMeh are a cut above the rest and have many advantages to offer as compared to regular adhesives. The company knows how to formulate A-quality adhesives that perform optimally on different substrates. From the automotive sector where the demand for weather-resistant and vibration-absorbing adhesives is high to the healthcare field where there always is a heavy demand for skin-friendly, hypoallergenic adhesive products, our range proves to be invaluable across sectors. To cater to unique requirements of clients from different fields, we even offer adhesives optimized for specific substrates and applications.

Our formidable reputation as an adhesive manufacturer stems from our dynamic professionals who fuel our operations and work unitedly so that we stay at the forefront of our domain. Our production personnel, and research and development team work to consistently push the boundaries of the latest adhesive technology. We also recruit a team of skilled quality controllers whose job is to ensure that adhesives we formulate can resist extreme temperatures, moisture, and mechanical stress. They also utilize their expertise to test product batches that align perfectly with their industry demands.

We select the best available variants of polymers and additives to manufacture our adhesive products. Use of quality inputs gives our range the perfect viscosity, tack, and bond strength. We source materials only from reputable suppliers who know how the raw material quality could affect our mixing and blending processes. Therefore, they provide us with A-class inputs, which helps us formulate large batches of quality adhesives featuring homogenous mixture and excellent properties. To assure the perfect quality in products, we also test each batch rigorously for its peel strength, sheer resistance, viscosity, and workability.
