PVC CUTLERY TREY

DRAWER SLIDES

"SHAPING QUALITY, SEALING TRUST"

At Driha, we take pride in being a trusted name in the field of modular kitchen components, offering a refined blend of premium quality, precision engineering, and lasting performance. Our product line, featuring PVC Cutlery Trays and Kitchen Drawer Slides, is crafted to meet the evolving demands of modern homes and professional kitchen installations.

Each product reflects our commitment to industrial-grade durability, smooth functionality, and aesthetically balanced design. Our PVC Cutlery Trays are built from high-grade, food-safe PVC-ensuring superior hygiene, elegant appearance, and perfect drawer compatibility. Likewise, our Drawer Slides are engineered for effortless movement, enhanced load capacity, and long-term reliability, even under heavy daily use.

With state-of-the-art manufacturing standards, stringent quality checks, and a nationwide dealer network, we aim to deliver products that combine innovation, consistency, and trust. At Driha, we don't just make kitchen fittings — we create solutions that elevate everyday functionality into a premium experience.

Upgrade your furniture with powerful, smooth-glide telescopic drawer channels built for strength and reliability. Crafted from premium corrosion-resistant steel, these slides ensure effortless drawer movement — even when fully loaded. The advanced ball-bearing mechanism guarantees silent and friction-free performance, while the full-extension design allows complete visibility and access to stored items.

A close-up photograph of a heavy-duty telescopic drawer channel. The channel is made of polished, corrosion-resistant steel and features a ball-bearing mechanism for smooth sliding. The background shows a white cabinet drawer with a dark interior, containing a few glassware items. The lighting is soft, highlighting the metallic texture and the precision of the engineering.

This is a heavy-duty telescopic drawer channel designed for smooth and stable drawer movement. Made from high-quality, corrosion-resistant steel, it features a ball-bearing mechanism that ensures quiet, friction-free sliding even under heavy loads. The slide consists of multiple telescoping sections, allowing full extension for easy access to drawer contents. Pre-drilled mounting holes make installation simple and secure for cabinets, furniture, and industrial storage systems. Ideal for kitchen drawers, office furniture, tool cabinets, and other pull-out applications.
