About Us

Midelta International is an organization with a vibrant nature in the healthcare and medical equipment industry whose reliable solutions enhance patient care and clinical effectiveness. Being a manufacturer, wholesaler, trader, supplier, exporter, and service provider, the company combines excellence in production with smooth distribution and responsive service support. Each solution is created keeping reliability, accuracy, and operational convenience in mind, and healthcare professionals and caregivers can concentrate fully on patient well-being. The product portfolio covers fingertip pulse oximeters, compact oximeters, Yuwell suction machine, electric suction apparatus, and portable handheld vascular doppler systems, which facilitate accurate monitoring and effective suction control. Every device has been designed to guarantee sound and dependable monitoring of critical care and home care with a lightweight and small body that makes them easy to move around and carry. The ease of use can be facilitated by clear display interfaces, user friendly working, and by quick-to-set-up processes in hospitals, clinics, emergency rooms, and homes with care.

Quality is ingrained in all the operations. The equipment is designed to be quiet and efficient in supporting suction in challenging clinical conditions, as well as be constructed using durable materials to give long term, reliable operation. Clean performance with smooth functionality and low maintenance needs makes performance intact. There are stringent quality policies to support all the processes, which underline patient safety and clinical confidence. Midelta International has a professional team that has embraced a service driven attitude and technical expertise. Ongoing innovation, robust collaboration with the industry, and in-depth insight into the healthcare requirements can help the company to provide a steady performance and custom-made solutions in the context of different medical settings.

Key Facts

Nature of Business	Dealer
Primary Competitive Advantages	infusion pump,bipap machine,cpap machine,BPAP,multi parameter patient monitor,fetal doppler,pulse oximeter,12 channel ecg machine,
No of Staff	11
Year of Establishment	2020
OEM Service Provided	No
ProductRange	infusion pump,bipap machine,cpap machine,BPAP,multi parameter patient monitor,fetal doppler,pulse oximeter,12 channel ecg machine,
