About Us

Mayster Engineering Private Limited manufactures a wide range of products, including waste handling equipment, agricultural machinery, hydraulic aerial access platforms, fogging machines, and light fixtures. As a provider of industrial equipment, we are equipped with a team of highly qualified workers and engineers in addition to other experts. We have devoted technical specialists and machine operators that are well-versed in their respective fields in addition to our educated staff members. We strive to give our clients precise equipment as needed, high-quality industrial equipment and goods, and consistent services through quality assurance and rigorous evaluations. We work in the areas of engineering and design, research and development, production planning and control, purchasing, quality assurance, stores, production, commercial, finance, and after-sales service. Our head office is in Delhi. Our areas of expertise include engineering and design, R&D, production planning and control, stores, quality assurance, manufacturing, commercial finance, and after-sale support. We hold registrations with OHSAS 18001:2007, ISO 14001:2015, ISO 9001:2015, CE, NSIC Certificate, and so forth. Sewer cleaning machines, water tankers, tippers, dustbins, fogging machines, lifts, environmental equipment and instrumentation, and environmental services have all developed work activities in the past.

Since its founding in 2008, our business has been committed to providing items that are unmatched and encouraging innovation. We have continuously exceeded expectations and established new standards for quality and customer satisfaction with more than ten years of operational excellence. Our diversified portfolio, which combines state-of-the-art technology with a customer-centric philosophy, reflects our commitment to excellence. We have continued to uphold our reputation for dependability, honesty, and creative solutions over the years. Our goal as we move forward is to stay ahead of the curve in the industry by offering top-notch solutions in the form of products such as industrial jaw and hammer crushers, belt and chain conveyors, screw conveyors, solid waste management plants, waste segregation systems, sand screening and washing plants, coal processing and handling plants, and big road sweepers.
