

A boom barrier's specifications vary, but generally include boom length, opening/closing speed, power supply, motor type, and safety features. Common boom lengths range from 3 to 6 meters, with opening/closing speeds typically between 1.5 to 6 seconds. Power supplies can be AC or DC, and motors can be brushless DC or other types. Safety features like photocells and loop detectors are often included to prevent accidents

**BOOM BARRIER- Model - SP BB 100 6M4S** (Electro Mechanical,  
Motorised with 6 Meter boom  
(Aluminum Hollow Section 100x44mm)  
Open Time 4 Sec / RIGHT Installed/ 2
