Product overview: Fluke 9062 Motor and Phase Rotation Indicator

Unique phase rotation indicator with motor rotation ability

The unique Fluke 9062 provides rotary field and motor rotation indication with the benefits of contact-less detection. Purpose made for commercial and industrial environments, the Fluke 9062 provides rapid indication of 3 phase rotation using test leads supplied or can be used to determine motor rotation on synchronous and asynchronous 3 phase motors. The contact-less detection is ideal for use on motors where the shaft is not visible. The included test probes have a variable clamping range for safe contact, also in industrial sockets.
