# ABOUT...

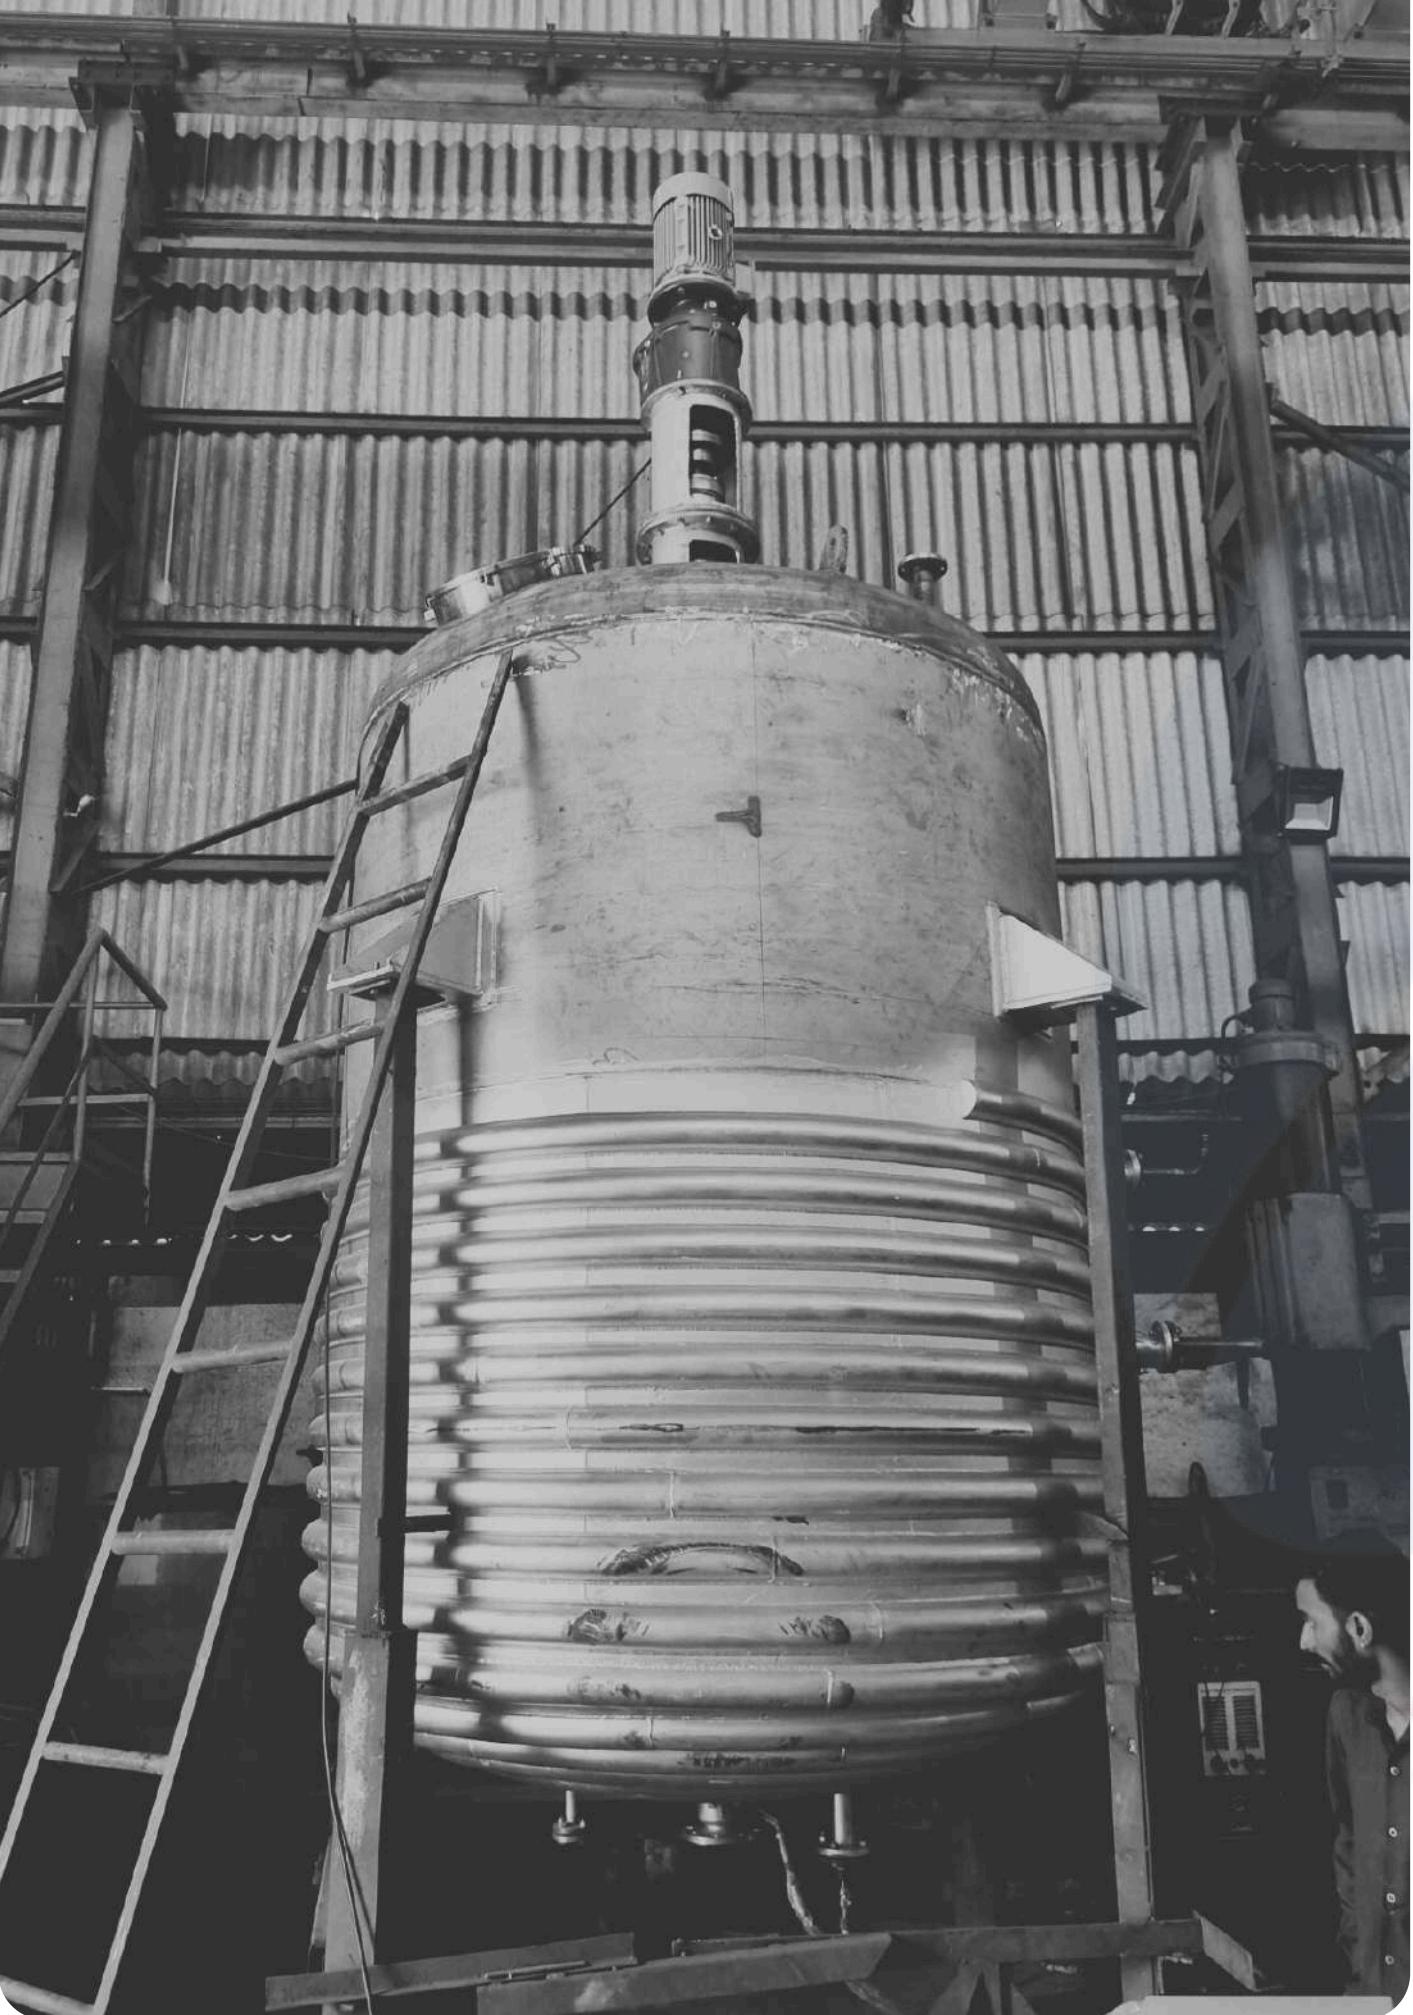

Our well-reputed company, Spritol Engineering Private Limited, is known in the market as one of the leading manufacturers and suppliers of industry-used products. Our offered range is varied and includes MS Storage Tank, Chemical Storage Tank, Shell And Tube Heat Exchanger, Resin Chemical Reactors, MS Chemical Tank, and more.

Numerous quality control and inspection processes have been implemented by us; they start as soon as raw materials are purchased and continue until the point of final shipping to the clients. Furthermore, because of our customer-centered approach and ability to satisfy huge and urgent orders, we are able to produce significant quantities of items for a large number of clients in a short period of time. Additionally, our extensive circulation network and highly qualified logistics personnel enable us to ship items within the promised time range.

The state-of-the-art infrastructure of our company enables us to manufacture bulk quantities of products that match with the highest industrial standards. For this, our well- developed manufacturing unit is fully equipped with advanced technology driven machines. Besides this, the entire manufacturing setup functions under the expert supervision of well- qualified professionals. Moreover, we use only first grade raw materials in our manufacturing process. As far as quality is concerned, we ensure that our products undergo regular strict quality checks based on multiple parameters before they are delivered to the customers. Moreover, our expert logistics team strives to deliver each and every consignment in very safe, efficient and timely manner. Our vast clientele includes Elkay chemicals Pvt.Ltd. and Thermax Enviro Ltd. Alkyl amines chemical Limited Dieco Industries Ltd. Benninger India Pvt. Ltd. Becto chem Pvt. Ltd. Cippy polyurethane Pvt. Ltd. Agio Pharma Ltd. Praj industries etc

# REACTOR VESSEL

Our Chemical Reactor Vessels are designed for controlled chemical reactions across industries like pharmaceuticals, petrochemicals, and food processing. Built from SS316/SS304, carbon steel they handle extreme pressure (up to 150 bar) and temperature (-80°C to +300°C) conditions. Available in capacities from 50L to 50,000L with customizable designs.

## Key Features:

- Jacketed for Temperature Control (steam/water/oil)
- Advanced Agitation System: Paddle, propeller, or turbine stirrers.
- Automation: PLC/DCS integration, real-time monitoring.
- Compliant with ASME and ISO standards.
- Safety Features: Pressure relief valves, CIP/SIP for hygiene.

## Applications:

- Pharmaceutical synthesis
- Petrochemical conversions
- Food & beverage processing
- Water treatment

# RESIN PLANT

Our Resin Manufacturing Plants are designed for efficient production of resins used in adhesives, coatings, and polymers. Fully automated and customizable, they ensure precise control over the entire process.

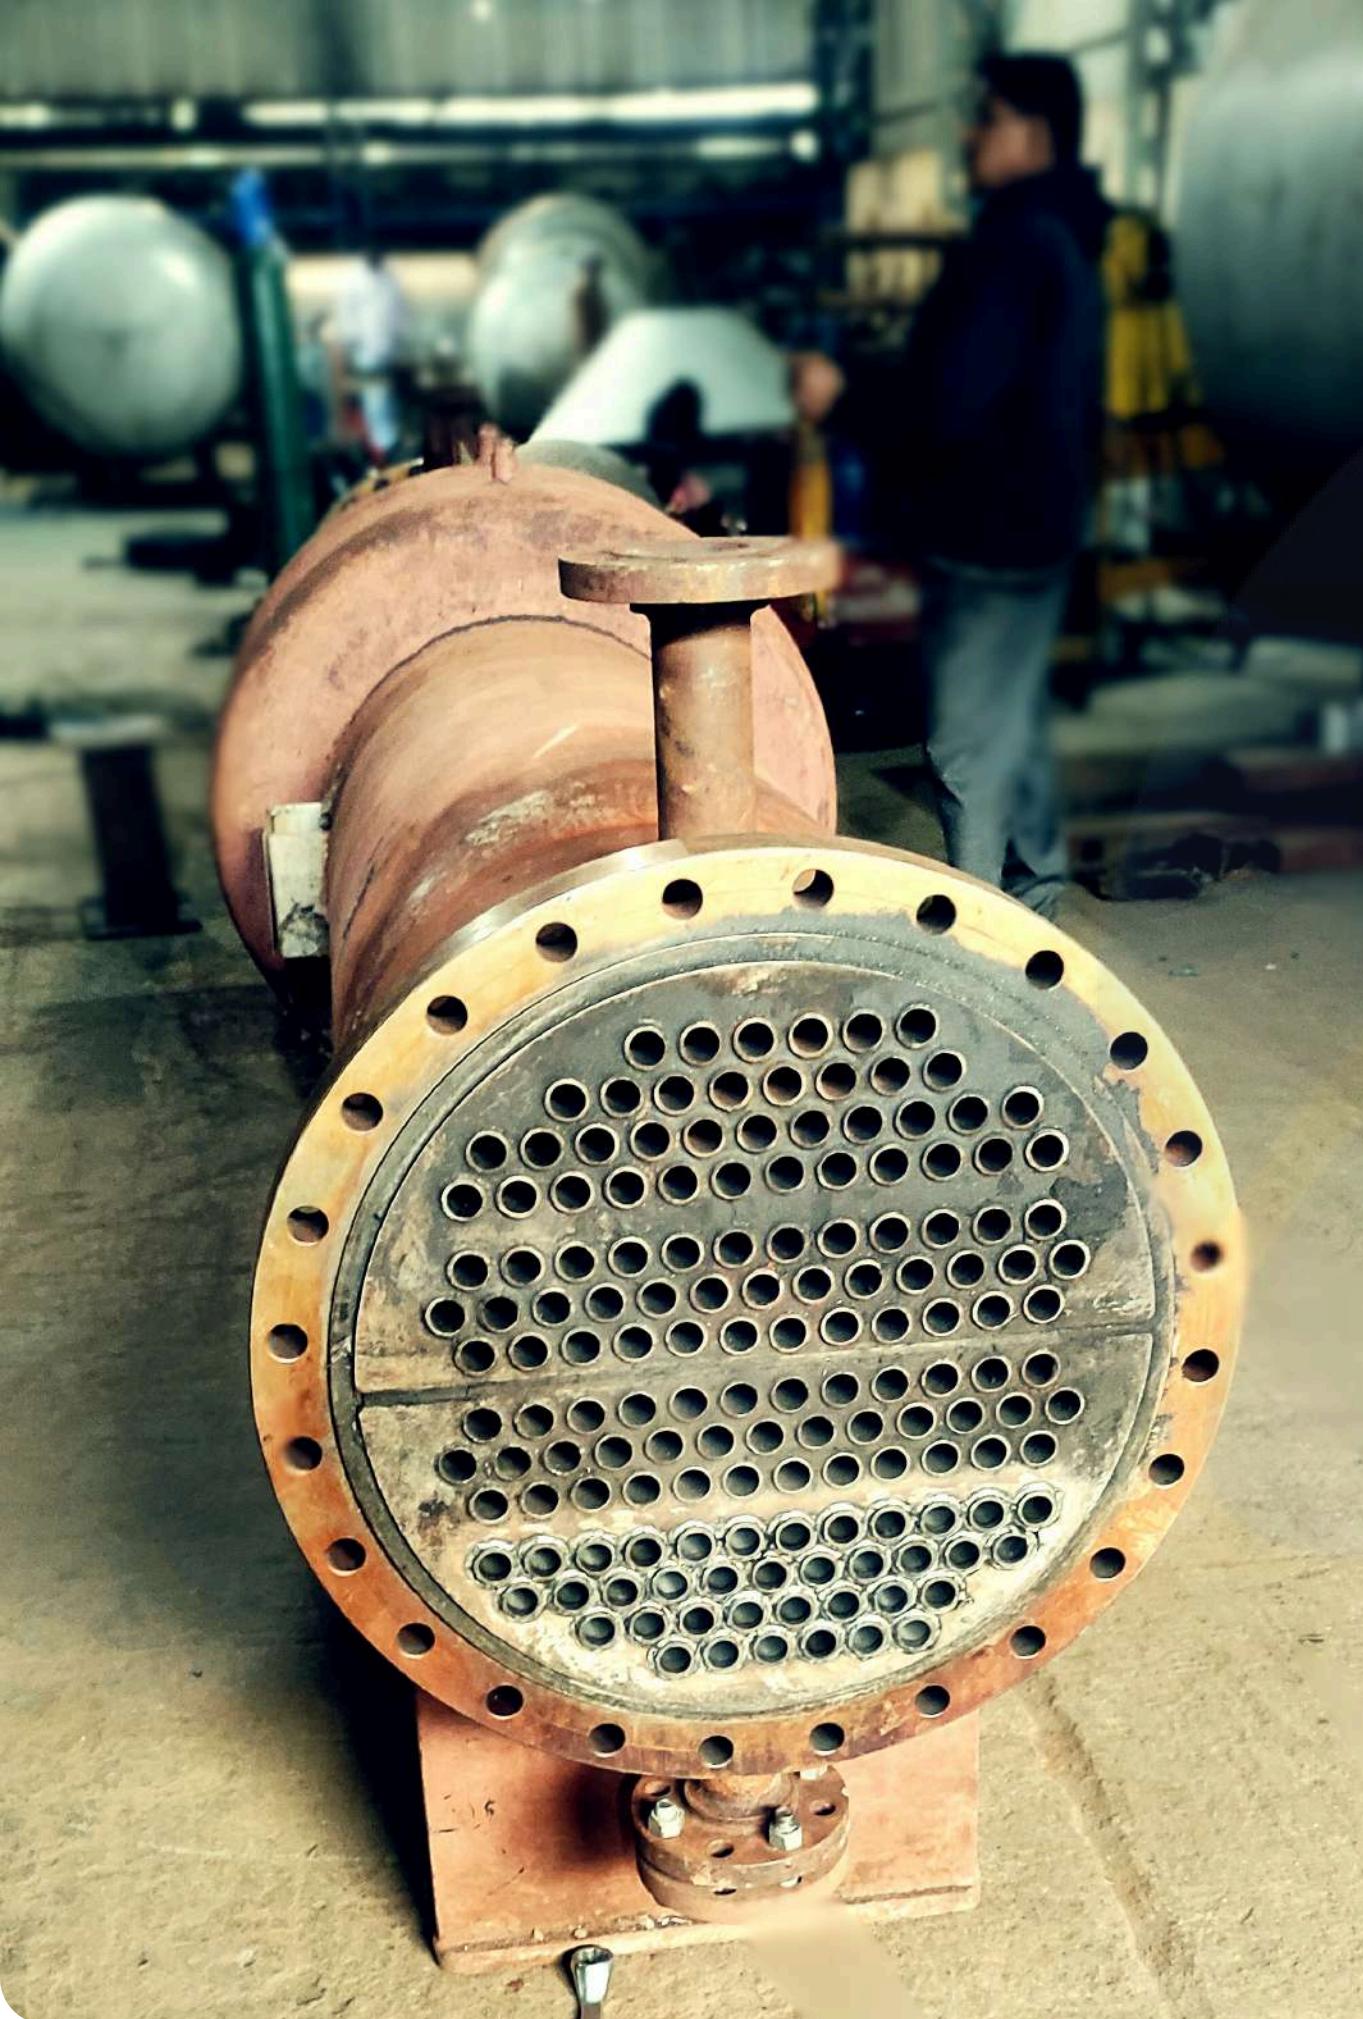

## Key Features:

- Material: SS316/SS304, glass-lined or PTFE-lined options.
- Reactor Types: Batch or continuous, with heat transfer systems and agitators.
- Automation: PLC/DCS with SCADA for real-time control.
- Distillation Units: Efficient solvent recovery and heat exchangers.
- Safety: Built to ASME, ISO, and GMP standards.

## Applications:

- Adhesives
- Paints & Coatings
- Plastics & Polymers

# CONDENSOR

Our Condensers are designed for efficient heat transfer and condensation across industries such as chemical, pharmaceutical, and petrochemical. Built with durable materials like SS316/SS304, carbon steel, and copper, they offer reliable performance and energy efficiency.

## Key Features:

- Types: Shell & Tube, Air-Cooled, Water-Cooled.
- Materials: Stainless Steel, Carbon Steel, Copper.
- Customization: Tailored capacity and size for specific needs.
- Compliance: ASME, TEMA, ISO 9001 standards.

## Applications:

- Steam condensation
- Solvent recovery
- Cooling in distillation and reactors

# STORAGE TANKS

Our Storage Tanks provide safe and durable solutions for storing liquids, chemicals, gases, and other industrial materials. Available in Stainless Steel (SS304/SS316), Carbon Steel, and Polypropylene (PP), they are designed for industries like chemical, pharmaceutical, food, and oil & gas, with options for customization.

## Key Features:

- Materials: Stainless steel, carbon steel, polypropylene.
- Design: Horizontal or vertical, single or double-walled, jacketed for temperature control.
- Capacity: From 500L to 100,000L, customizable to meet your requirements.
- Compliance: Certified to ASME, API 650, and IS 803 standards.
- Optional Accessories: Manways, agitators, level indicators, safety valves.

## Applications:

- Chemical storage
- Water and wastewater storage
- Oil and fuel storage
- Pharmaceutical raw materials

# MIXING TANK

Our Mixing Tanks are engineered for efficient blending of liquids, powders, and slurries across industries such as chemical, pharmaceutical, food and beverage, and cosmetics. Built for reliability, these tanks ensure optimal mixing performance.

## Key Features:

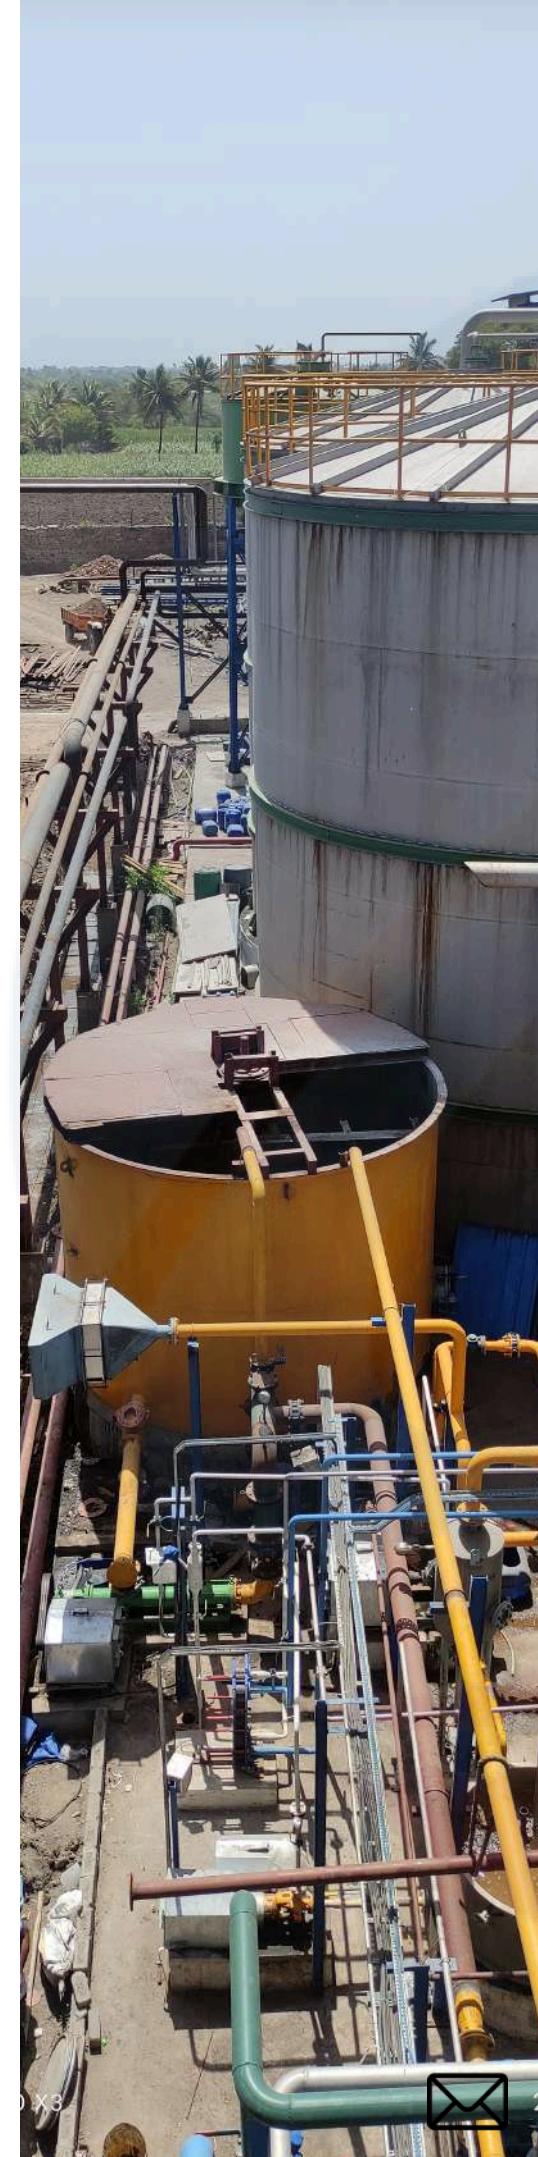

- Materials: Available in SS304/SS316, Carbon Steel.
- Design: Jacketed for temperature control; available in vertical or horizontal orientations.
- Capacity: Ranges from 100 liters to over 50,000 liters.
- Agitation Systems: Equipped with turbine, paddle, anchor, or helical agitators.
- Compliance: Meets ASME, ISO 9001, and FDA standards.

## Applications:

- Chemical production
- Pharmaceutical formulations
- Food and beverage mixing
- Cosmetic preparations

## Why Choose Us?

- Customizable: Tailored designs for specific needs.
- Durable: High-quality construction for long-term use.
