

Manual Valves

Disc Check Valves

Size range	½ to 8 inches
Body	CF8/ CF8M
Disc	SS 304/ SS 316
Pressure	Metal to Metal, Soft seated
Disc Seat	Standard
Max. oper. press	Upto 42 Bar
Max. Oper. Temp	Upto 300 C
Testing	As per API 598

Owing to the finest quality of raw material used in their construction, our safety valves following opening, acquires the degree of lift necessary for optimum discharge rate within a pressure rise of not more than 10%, thus protecting the equipment from dangerous high pressure.

Manufactured in compliance with industry norms and standards, these valves efficiently meet the various industrial application requirements.

Safety Manual Valves
