## About Us

We, B. D. Fans & Enviro Engineering believe in continuous improvement and to be updated with the latest market trends. Our researchers conduct researches that allows us to design, review and implement all the new processes for developing the best range of Gas Cleaning System For Submerged Arc Furnace, Pedestal Man Cooler Fan, Axial Flow Fans, Centrifugal Blower, Induced Draft Fan and many more. This is what we do as a manufacturer. However, as a service provider, we undertake Services For Turnkey Projects in which we analyse the costs for material and labor; set protocols and procedures; review the designing and constructing phase; keep an eye over maintenance and alteration and several other parameters. By doing all, we ensure that each and everything we perform is done as per the quality standards laid down by the industry.

Our products and services find usage in various areas such as government facilities, chemical industry, petrochemical industry, energy generating plants, etc. With all these, we have established a strong foothold and earned reputation in the market.
