

Polyacrylamide Emulsion

Application Fields:

- · As flocculants for wastewater from different industries
- Thickening agent for textile printing and coating
- Coal washing and sedimentation
- · Wet strengthening agent, resident agent for paper making
- Sludge dewatering
- · Drilling mud additive for oilfield
- For sugar refining
- · Shale stabilization
- Solid Stabilizer
- · Mining (coal, gold, diamonds etc.)
- Paper-making
- · Coal washing

Specifications:	Anionic Type	Cationic Type
Molecular Weight:	16-22million	6-12million
Charge Degree:	Medium-High	
Solid Content:	35 - 41%	
Brookfield Viscosity:	10-1000cps	100-600cps
Specific Gravity at 25°C:	1.05-1.25g/m3	
AM Residual:	0.05%Max	
Recommended Working Concentration:	0.05-0.5%	
Dissolve time (Min):	30 Max.
