

**BWD-01 Water Decoloring Agent** is a quaternary cationic polymer which is the special product for de-coloring, flocculating, CODcr decreasing and other applications.

- Stronger decolorization (50%~99%) and removal of COD (50%~80%).
- Used to de-color high-colority effluent from dyestuffs plants. High performance to treat wastewater with Reactive, Acid, Disperse, Direct Dyestuff etc. (Soluble and Insoluble dyestuffs).
- Non-pollution (no aluminum, chlorine, heavy metal ions etc.).
- Less sludge produced than other inorganic coagulants.
- Textiles, dyestuff, pigment, ink, paper and other industries effluent color removal.
- Used as fixing agent in the paper & pulp processing.
