WEAVING CONFIDENCE, CLASS & CHARACTER

A decade of weaving excellence in uniforms

Uniform is beyond clothing. It is the mark of the organization or group for which one stands for. It is an elaborate form of corporate identity, making one special, imbuing him with pride, esteem and loyalty to his company, while reminding him of his privileges and responsibilities. Woven Fabric, a market stalwart in textile and garment industry with an expertise beyond eight years, have profoundly understood the meaning and varied nuances of uniforms, and what it stands for. That is why, through the short span of our existence, we have been able to emerge a market leader, supplying perfectly designed and outfitted world class uniforms, corporate wears, industrial wears, hospital wears etc on both national and global arena with outstanding quality, durability and finish that are in par with the best in the world.

Woven Fabrics company, a vision and ambition of technocrat turned business man, had its inception in 2007 in Mumbai & Sister concern company, Maryan Apparels in Kannur, Kerala. Profound understanding of the requirements and state-of-the-art equipments to meet the clients' needs in the best way enabled us to deliver consistently on the plain of customer satisfaction. We followed excellence and hard work and success naturally followed us. Today, Woven Fabric Company flaunts 2 full-fledged processing units and an enormous workforce of more than 600 to meet the escalating demand.

DIVERSE PRODUCT MIX

Name it, and we will deliver it!

We are equipped. We are confident. Come to us with any requirements ranging from corporate wears to school uniforms or from industry wears to air force uniforms. We have the right solution for you! Equipped and ready to meet your diverse requirements, we manufacture a really wide range including uniforms, corporate wear, industrial wear, protective and safety wear, sports apparels, hospital wear, Commando uniforms and more.

WOVEN FABRIC COMPLETION

VERSATILE PRODUCT RANGE

FLAME RETARDANT FABRICS

The inherently & treated flame retardant fabric is engineered so that flames do not spread quickly and have some self-extinguishing characteristics, although this does not mean that if fabric is ignited it will extinguish itself. The molecular structure of the fibers of our inherently & treated flame retardant textile has been engineered to provide the required flame retardant characteristics.

HI- VISIBILITY FABRICS

High visibility fabrics are essentially required to work in conditions of low visibility. This may be caused by lack of ambient light, inclement weather or other conditions that restrict or hinder visibility. During these periods of limited visibility, it is critical that workers be seen and recognized.

They have superior luminosity and have bright colours- High Visibility Yellow, High Visibility Orange and High Visibility Red.

ANTI STATIC FABRICS

Electrostatic resistance is required when the worker is exposed to environment where a spark could cause explosions or ignite fires (e.g. petrol stations, petrol tanker drivers, flour mills, clean rooms etc..)

CAMOUFLAGE PRINTS

The intent of camouflage is to disrupt an outline by merging it with the surroundings, making a target harder to spot or hit. Different countries have undergone different evolutionary stages towards the development of military camouflage.

WORK WEAR FABRIC

Work wear fabric require toughness and comfort for good workmanship. We have engineered work wear fabrics with unique combinations to meet requirements of industrial customers.

HEALTH CARE FABRICS

Medical scrubs and nursing uniforms are the day-in and day-out uniform of choice worn by medical professional around the world. They are functional, provide protection from the dangers of the job and are proven way to promote the ultra-sanitary environment requires in emergency room and operating room environments. And while medical scrubs and nursing uniforms are well established in the workplace, they are by no means at a standstill in their evolutionary process. Today, new fabric technology is in the works that will make them even more functional and sanitary on the job.

CORPORATE WEAR FABRIC

We provide uniforms through our range of products, quality, comfort and image expected by administrations and companies for their teams. Our fabrics meet all specifications needed in terms of resistance, appearance and colour fastness. Our creativity allows us to develop special fabrics in terms of structure, colours and finishing in order meeting expectations.

NOMEX COVERALLS, WORK WEARS & PROTECTIVE WEARS

NOMEX is a heat- and flame-resistant fibre used in protective solutions. Heat and flame protection is engineered into the molecular structure of the Nomex fibre. It does not come from chemical treatment. This means that the heat and flame resistance of Nomex fibre is inherent and will last the life of the garment. A blend of 93% Nomex® with 5% Kevlar® and 2% antistatic fiber, this innovative fabric helps minimize break-open, and expands to form a stable and inert barrier between fire and skin.

Additional Nomex® fabric considerations:

- Widely used by petroleum, petrochemical, chemical, and utility industries, as well as firefighters
- Inherent thermal protection that cannot be washed away
- Durable and resistant to abrasion, tears, and chemicals
- Complies with NFPA 2112 Standard on Flame-Resistant Garments for Protection of Industrial Personnel Against Flash Fire
