About Us

ASN Enterprises is a vibrant manufacturer and provider that aims to redefine outdoor lighting by employing strength of the structure, architectural beauty, and accuracy in the engineering. All solutions are based on the vision to improve landscapes, streetscapes, residential areas, and urban landscapes with lighting structures that do not conflict with contemporary and traditional designs. Design philosophy is based on the designing of elegant shapes that perfectly incorporate functionality and aesthetics to make sure that every installation makes an impact on the nature of its environment. Specialization is in decorative, lighting poles, square lighting poles, garden lighting poles, laser bollard light, and laser path way bollard light systems. Every construction is highly engineered to provide high stability, high performance, and extended outdoor activities. Dimensional accuracy and uniform quality are granted by advanced fabrication methods, and a variety of corrosion resistant finishes, against adverse environments. Our firm is focused on outstanding provision of lighting structures that can withstand the harsh outdoor conditions with minimum maintenance needs.

Sustainability is the driver behind innovation. Lighting compatibility, which is environmentally friendly, contributes to the provision of bright and reliable energy efficient lighting. Projects can be configured to fit individual architectural themes, technical requirements, and space needs. All solutions are an expression of strength, safety, and aesthetic sophistication. Production is not all about commitment. High focus is given to reliability, structural integrity, and easy incorporation into various urban and residential landscapes. Every project is a joint venture that is intended to bring outdoor spaces to the next level with carefully designed lighting facilities.
