

**Product name:** Dia- Blaster Machine

**Product Application:** Lucan's Dia-Blaster - The ultimate diamond black carbon cleaner machine brings you unlimited possibilities for creative freedom, high production, high efficiency and project diamonds, cleanly and clearly in just 2-steps.

**Product features:** The ultimate diamond black carbon cleaner machine is a airflow-based blasting machine that brings you unlimited possibilities for creative freedom, letting you select and project diamonds, cleanly and clearly. Lucan's Dia-Blaster is simple yet efficient. It uses a strong air force with a powder to remove the deposited black carbon layer of the diamond. It uses airflow to direct small abrasive particles towards the bottom of the box and makes the diamond sparkling clean.

The high production, high efficiency and direct drive allowing maximum wear part life and consistent cleaning results, Lucan's Dia-Blaster shines your diamond in just 2-steps. Place the diamond and press the paddle a few seconds and VOILA, it's done! Other benefits include -

- Process takes only a few seconds and it is quick to operate
- No specific training required
- No chemicals in use results in less health hazards and long life of diamonds
- The machine is built ergonomically i.e. it is highly compact. Thus, it can easily fit anywhere
- Minimizes diamond weight loss during the removal process
- A single diamond or a group of diamonds can be cleaned simultaneously
- Cost-effective, saves up on labor and time cost

With the effortless help of the Lucan's Dia-Blaster, you experience limitless potential to warp and transform the diamond and the ability to revolutionise the way you capture and create jewels.
