## About Us

Eco-friendly options for transportation and logistics are provided by electric vehicles like loaders and rickshaws. They lessen the impact on the environment by mitigating carbon emissions. Their electric motors operate quietly and require little maintenance. By enhancing the efficiency of goods transportation and encouraging a quieter and cleaner urban environment, these cars support sustainable urban mobility.

Since 2018, our company, Harshvie Industries Private Limited, has been conducting its business operations out of Howrah, West Bengal, India. We manufacture and supply items like Heavy Duty E Cargo Loader, Electric Rickshaw, etc. The infrastructure of our company is spread over a large acre of land, which is well equipped with the latest tools and technology required for the manufacturing and testing of our items.
