SHOE COVER

- WOVEN
- POLY

EXAMINATION GLOVES

Examination gloves are disposable gloves widely used in medical, dental and laboratory settings to ensure hygiene and protection against contamination. They act as a barrier between the hands and harmful substances, keeping both professionals and patients' safety. Examination gloves are made from latex, nitrile, or vinyl, these gloves are lightweight, comfortable, and designed for single use. Apart from healthcare, examination gloves are also used in various industrial applications such as food processing, cleaning, chemical handling, and electronic assembly, where safety and hygiene are essential. Their versatility and protective qualities make them an important tool across multiple industries.

NITRILE EXAMINATION GLOVES

Our nitrile gloves are high-quality disposable gloves made from synthetic rubber, offering superior resistance to punctures, chemicals, and tears. They are widely used in medical, laboratory, and industrial environments where durability and protection are essential. Being latex-free, nitrile gloves are also safe for people with latex allergies, making them a preferred choice in healthcare. Their snug fit, flexibility, and textured fingertips provide excellent grip and comfort during use. Apart from medical examinations, nitrile gloves are also used in food processing, cleaning, automotive, and chemical industries, ensuring safety and hygiene across multiple sectors.

LATEX EXAMINATION GLOVES

We supply premium **latex examination gloves** designed to provide excellent protection, comfort, and sensitivity. Made from natural rubber, these gloves are strong, flexible, and offer superior barrier protection against contaminants and infections. They are widely used in medical, dental, and laboratory settings where hygiene and safety are critical. Latex examination gloves provide a snug fit and high elasticity, ensuring ease of movement and precision during use. In addition to healthcare, they are also suitable for use in cleaning, food processing, and light industrial applications, making them a reliable choice for multiple sectors.

VINYL GLOVES

We offer high-quality **vinyl gloves** that provide reliable protection and comfort for everyday use. Made from synthetic PVC material, vinyl gloves are cost-effective, lightweight, and free from latex, making them suitable for people with latex allergies. They are widely used in food handling, cleaning, beauty, and healthcare industries where frequent glove changes are required. With a smooth texture and comfortable fit, vinyl gloves ensure hygiene and safety in both medical and industrial applications, offering a practical solution for short-term tasks.¹

SURGICAL GLOVES

Our Surgical gloves are high-quality, hand-specific disposable gloves supplied in left and right pairs, not ambidextrous. Designed especially for doctors and healthcare professionals during medical procedures and surgeries, they ensure a perfect anatomical fit for maximum comfort and precision. Made from premium materials like latex, nitrile, or neoprene, these gloves provide a sterile barrier that protects both patients and medical staff from infections and cross-contamination. They are stronger, more durable, and offer superior touch sensitivity compared to regular examination gloves, enabling surgeons to perform delicate tasks with accuracy. Available in both powdered and powder-free options, *Fresh Care Enterprises* guarantees top standards of hygiene, safety, and reliability in healthcare.

NITRILE SURGICAL GLOVES

Nitrile & Polyisoprene Surgical Gloves by Fresh Care Enterprises are premium, latex-free gloves crafted for maximum safety and comfort in surgical procedures. Made from high-quality synthetic nitrile and polyisoprene, they provide superior puncture resistance, chemical protection, and excellent tactile sensitivity while eliminating the risk of latex allergies. Hand-specific and available in both powdered and powder-free variants, these gloves ensure hygiene, durability, and precision in every operation.

SURGICAL LATEX GLOVES

Surgical Latex Gloves are high-quality, hand-specific gloves designed to provide maximum protection and precision during medical and surgical procedures. Made from natural latex, these gloves offer excellent elasticity, superior comfort, and high tactile sensitivity, allowing surgeons to perform delicate tasks with confidence. They create a strong sterile barrier against infections and contaminants, ensuring safety for both patients and healthcare professionals. Available in powdered and powder-free variants, *Fresh Care Enterprises* deliver reliable, durable, and hygienic latex surgical gloves trusted in healthcare settings. These gloves are manufactured to international quality standards, making them suitable for critical operations. With consistent performance and dependable protection, they are a preferred choice for hospitals and surgical centers worldwide.

ORTHO SURGICAL LATEX GLOVES

Ortho Surgical Latex Gloves are specially designed, hand-specific gloves made for orthopedic and high-risk surgical procedures. Crafted from premium natural latex, they provide extra thickness and strength to withstand rigorous bone and joint surgeries while maintaining excellent elasticity and comfort. These gloves offer superior tactile sensitivity, ensuring precision even in demanding conditions. With a strong sterile barrier against infections and contaminants, they guarantee safety for both patients and healthcare professionals.

Available in powdered and powder-free variants, Fresh Care Enterprises delivers durable, reliable, and hygienic ortho surgical latex gloves trusted in critical operations worldwide.

WHITE SURGICAL LATEX GLOVES

White Surgical Latex Gloves are premium-quality, hand-specific gloves designed to ensure safety, comfort, and precision during surgical procedures. Made from high-grade natural latex, these gloves provide excellent elasticity, superior grip, and enhanced tactile sensitivity, enabling surgeons to perform delicate tasks with confidence. Their white color highlights cleanliness and purity, making them ideal for medical and surgical environments. Offering a strong sterile barrier against infections and contaminants, these gloves are available in both powdered and powder-free variants. With durability and reliability, Fresh Care Enterprises ensures top standards of hygiene and protection in every pair of white surgical latex gloves.

MASKS

SURGICAL MASKS

Surgical Mask are high-quality 3-ply protective masks designed to safeguard healthcare professionals, patients, and the public from airborne particles, bacteria, and viruses. Each mask is made from three layers of premium nonwoven fabric, with a melt-blown middle layer that acts as an effective filter against microorganisms and fine particles. The outer layer repels fluids, while the inner layer provides comfort and breathability during long hours of use. Featuring a secure nose clip and soft ear loops, these masks ensure snug fit and reliable protection in medical, surgical, and everyday environments. Durable, hygienic, and comfortable, Fresh Care trusted for maintaining safety and infection control.

masks are

- **MELT BLOWN**

Nonwoven Masks are made from spun-bond nonwoven fabric that provides basic protection against dust, droplets, and large particles. They are lightweight, breathable, and comfortable for everyday use, offering general safety in non-medical environments.

- **NON-WOVEN**

Melt-Blown Masks on the other hand, have an additional melt-blown filter layer between the nonwoven outer and inner layers. This middle layer acts as a fine filter that traps bacteria, viruses, and microscopic particles, making them highly effective for medical, surgical, and high-risk environments. While nonwoven masks are suitable for daily protection, melt-blown masks provide superior filtration efficiency and higher safety standards.

N95 MASK

N95 Masks are high-performance respiratory masks designed to filter at least 95% of airborne particles, including bacteria, viruses, dust, and pollutants. Made with multiple layers of nonwoven and melt-blown fabric, they provide advanced protection while maintaining breathability and comfort. N95 masks are available in different variants: cup-shaped for a snug and secure fit, foldable (flat-fold) for easy portability, valved masks for reduced heat and moisture build-up during long wear, and non-valved masks for complete two-way protection in medical environments. Equipped with adjustable nose clips and soft straps, Fresh Care Enterprises N95 masks ensure maximum safety, durability, and comfort, making them ideal for healthcare, industrial, and everyday use. These masks are tested to meet international filtration standards, ensuring reliable performance in critical conditions. Designed for long wear without compromising on breathability, they reduce user fatigue during extended use. With trusted quality and consistent protection, Fresh Care Enterprises N95 masks are a preferred choice for hospitals, frontline workers, and safety-conscious individuals.

BOUFFANT CAP

Bouffant Caps are lightweight, disposable head covers made from high-quality nonwoven fabric. Designed in a puffed, round shape with a soft elastic band, they provide full coverage of the head and hair, ensuring maximum hygiene in medical, surgical, laboratory and food-handling environments. Breathable, skin-friendly, and comfortable for long wear, these caps effectively prevent hair and dandruff from contaminating sterile areas. Fresh Care Enterprises bouffant caps are durable, hygienic, and an essential choice for maintaining cleanliness and safety in professional settings. They are available in different sizes

and colors to suit varied workplace requirements. Easy to wear and remove, they help save time in fast-paced environments. Manufactured under strict quality standards, they ensure consistency and reliability in every piece. Cost-effective and practical, bouffant caps by Fresh Care Enterprises are trusted by hospitals, clinics, and industries worldwide.

Surgeon Bouffant Cap is a disposable head cover designed to fit snugly on the head, covering only the scalp and hair. It is usually made from nonwoven fabric or cotton and is tied at the back. Surgeon caps are commonly worn by doctors and surgeons in operating rooms to maintain a sterile environment and prevent hair from contaminating surgical fields.

Surgical Bouffant Cap is a loose-fitting, puffed-style cap made from soft nonwoven fabric. It covers the entire head, including long hair, and is secured with an elastic band. Bouffant caps are widely used by nurses, OT staff, laboratory workers, and food industry staff where complete hair containment and hygiene are essential.

🔑 Key Difference:

- **Surgeon Cap** → Tight fit, covers short hair, used mostly by surgeons/doctors. Sterile, → Sterile, premium quality, for surgeons in OT.
- **Surgical Bouffant Cap** → Loose fit, covers all hair types/lengths, used by wider medical and industrial staff. → General hospital use, non-sterile, for staff & nurses.

SHOE COVER

Shoe Covers are high-quality protective covers designed to maintain hygiene and prevent contamination in hospitals, laboratories, clean rooms, and industrial environments. Made from durable nonwoven or polyethylene material, they are lightweight, waterproof, and slip resistant. These disposable covers create a protective barrier against dirt, dust, and microbes, ensuring a sterile and clean environment. Easy to wear with an elastic grip for a secure fit, Fresh Care Shoe Covers provide maximum safety, comfort, and reliability in every step.

NON-WOVEN SHOE COVER

Non-Woven Shoe Covers are lightweight, disposable footwear covers made from high-quality non-woven fabric. Designed to maintain hygiene and prevent cross-contamination, they are widely used in hospitals, laboratories, cleanrooms, and food industries. These covers are breathable, dust-resistant, and comfortable for long wear, ensuring cleanliness and safety in sterile environments. With an elastic grip for a secure fit, Fresh Care Enterprises non-woven shoe covers provide reliable protection while being economical and easy to use

POLY SHOE COVER

Poly Shoe Covers are lightweight, disposable protective covers made from high-quality polyethylene material. Designed to maintain hygiene and prevent contamination, they are ideal for hospitals, laboratories, cleanrooms, food processing units, and industrial environments. These covers are waterproof, tear-resistant, and easy to wear, providing a secure fit with elastic edges. Fresh Care Enterprises poly shoe covers ensure maximum cleanliness, safety, and convenience while protecting floors and footwear from dirt, dust, and microbial contamination.

Fresh Care Enterprises: Trusted Global Supplier in Healthcare & Industry

Our Philosophy

At Fresh Care Enterprises, we have established ourselves as a responsible manufacturer, importer and professional supplier to the healthcare and industrial sectors. With our dedication to quality, ethical procurement, and on-time delivery, we have emerged as a known and trusted name in the international supply chain.

Who We Are

Backed by years of professional experience, our team understands the critical importance of safety, hygiene, and reliability in supply chains. We operate with integrity and a commitment to exceeding industry standards. Fresh Care Enterprises is guided by values that emphasize customer satisfaction, business efficiency, and ethical trade practices.

Our Mission

To bridge the demand-supply gap with speed, agility, and value-driven service. Every step—from logistics to documentation—is handled with precision and care. Our purpose is to deliver value to our clients through reliable sourcing and seamless distribution.

Our Vision

To become a world-class brand known for integrity, quality, and service excellence, while maintaining the personalized attention our clients value.

What Makes Us Unique

- ☒ Reliability – On-time delivery, safe logistics
- ☒ Professionalism – Respectful, transparent interactions
- ☒ Compliance-Driven – Safety and legality at every step
- ☒ Customer-Focused – Your needs always come first
