

50kg Sorghum Jawar, Dry Maize, Indian Jawar, etc.

INDIAN JAWAR

DRY MAIZE

50KG SORGHUM JAWAR

About Us

Maruthi Agro Industries was started after acquiring rich information about various agro commodities, their seasons, market demands and consumer buying behavior. Right from inception, our knowledge has helped us in catering to the requirements of customers and emerging as a prominent trader of agro items such as Indian Jawar, Dry Maize, and Sorghum Jawar. These are organically grown and cultivated by our linked farms. The offered Indian grains are packed with carbohydrates, minerals, protein, and dietary fiber. Due to the aforementioned nutrients, these are considered an excellent alternative to refined flour and all-purpose flour in India.

We supply our 100% pure maize and jawar to customers after examining the quality. We conduct series of quality tests by taking random samples from procured batches. The quality evaluation we do assures us regarding the good taste, freshness, shelf life, and many other aspects of our products. The conducted tests also assure us that the grains that we are going to supply are free from diseases and adulteration.
