About Us

Established in 1982, M/s Rajvi Chemical Corporation LLP has gained success in the market by supplying superior grade chemicals that are suitable to be used for various applications. Working from our head office in Mumbai, we are a supplier, trader and wholesaler of Boric Acid Powder, Caustic Soda Flakes, Prilled Urea, Msc Monosodium Glutamate and many other products. These chemicals are utilized in various industries including agriculture industry, cosmetics industry, food processing industry, water treatment industry and several others. Our products are known in the market due to their excellent composition, effective usage, purity and longer shelf life. In order to offer our customers a qualitative experience, we make sure to source these products from the best vendors in the market.

Under the wise leadership of our mentor, Mr. Vijay Nagindas Mehta, we have consistently experienced growth over the course of our existence in the industry. To make sure that our products are delivered on time, we have developed a wide-spread distribution network which is handled by a team of experts. Furthermore, we also possess a well-managed warehousing division which allows us keep a stock of products and cater to the bulk orders quickly.
