

2 Chute Sorter Machine

Description

The 2 Chute Sorter Machine is an industrial sorting solution designed for efficient material separation and inspection. It features a compact structure with dual chutes, touch display controls, and automated sorting operation. Suitable for industrial applications including grain sorting, food processing, and material classification.

Key Specifications:

- Type: 2 Chute Sorter Machine
- Power Supply: 220 V
- Air Pressure: 0.6–0.8 Bar
- Weight: 600–700 kg
- Dimensions: 1912 × 1574 × 2090 to 3188 × 2788 × 2090 mm

- Usage: Industrial
