

PDBAB-219073146 - 5 Chute Sorter Machine

Description:

The 5 Chute Sorter Machine is an industrial color sorting system designed for accurately separating grains, pulses, rice, seeds, coffee beans, spices, and other granular materials. It features five sorting channels, advanced optical detection technology, and a touchscreen control panel for efficient operation. The machine delivers high sorting accuracy, stable performance, low power consumption, and is suitable for continuous industrial use.
