

# Product Description – Light Fabric Heat Transfer Paper

Light Fabric Heat Transfer Paper is specially designed for transferring high-quality prints onto light-colored fabrics using inkjet printers. It delivers vibrant colors, sharp image clarity, and a soft finish, making it ideal for customized T-shirts, apparel, and textile printing. This transfer paper is easy to use and works efficiently with standard household irons or heat press machines. It ensures strong adhesion and long-lasting prints that resist cracking, peeling, and fading even after multiple washes. Perfect for DIY printing, commercial printing businesses, and promotional merchandise production.

## Key Features:

- 1 Compatible with inkjet printers
- 2 Ideal for light-colored fabrics
- 3 High-resolution image transfer
- 4 Soft and smooth finish after transfer
- 5 Wash-resistant and durable prints
- 6 Suitable for heat press and iron application
