VHP STERILIZATION CHAMBER

About Us

Rayshen Environmental Private Limited is dedicated to producing innovative contamination control solutions that redefine hygiene, efficiency, and performance in cleanroom, laboratory, and pharmaceutical settings. Being a manufacturer and supplier, the company deals with precision-engineered products that epitomize excellence, integrity, and futuristic design. Products like laminar airflow system, dispensing booth, lab pass box, laminar airflow trolley, cleanroom booth, vhp sterilization chamber, stainless steel furniture, clean room wardrobe, stainless steel shoe rack, air shower, fan HEPA filter units, and compact HEPA filter are designed to satisfy the highest standards of cleanroom technology. These products are not only equipment but revolutionary systems designed to enhance operational accuracy, minimize contamination hazards, and protect critical processes.

Designed using medical-grade materials and cutting-edge airflow engineering, the systems guarantee effortless integration, energy efficiency, and outstanding performance reliability. Tailoring is the essence of each solution, giving industries access to bespoke products optimized to make the most of space, safety, and compliance. The company's signature is its compliance with international regulation requirements while providing validation documentation support and extended technical assistance. Behind each solution is a promise, to provide sustainable, low-maintenance, corrosion-resistant innovations that benefit industries such as pharmaceuticals, biotechnology, laboratories, hospitals, and other sensitive environments. With a seasoned and responsive team, Rayshen Environmental Private Limited integrates smart design with efficient manufacturing and cleaning processes to provide consistent excellence.
