

Panorama Printing Inks

Established in the year 1988 **PANORAMA PRINTING INKS** is India's well-reputed organization that has evolved expertise in the arena of manufacturing & supplying of :

- *Flexographic Water & Solvent Based Inks.*
- *Rotogravure Solvent & Water Based Inks.*
- *Screen Printing Inks.*
- *Inks for Non Woven Fabrics.*
- *Pad Printing Inks.*
- *Reverse Lamination Inks.*
- *U. V. Curable Inks.*
- *Offset Inks.*
- *Polyester Inks.*
- *Plastisol Inks.*
- *Textile Inks.*
- *PVC Inks.*
- *Matt Inks.*
- *Gloss Inks.*
- *2 Pack Inks.*
- *Night Glow Inks.*
- *Marking Inks.*
- *Surface Coating.*
- *Roller Coatings.*
- *Spray Coatings.*
- *Specialty Inks.*
- *Auxiliary & Ancillary Products.*

With our competence and grit, we have successfully catered to various Printing and Packaging Industries.

Since Inception, **PANORAMA PRINTING INKS** has grown in stature under the sharp headship of **Mr. Ayaz Lashkari.**

Panorama Printing Inks

Quality Management:

Quality forms the core objective of our esteemed organization. Our inks undergo stringent quality tests under the supervision of our quality experts to maintain our quality standards.

Infrastructure & Resources:

Our technically sound manufacturing unit is equipped with the advanced machineries and latest testing equipments.

Customer Satisfaction:

Customer Satisfaction is the prime objective of our company besides quality.

The Prominent Features of our Inks are:

- **Extremely Stable.**
- **Excellent Bond Strength on Various Surfaces.**
- **Versatility in terms of printing conditions of various press speeds.**
- **Not harmful to doctor-blade/stereo/screens.**
- **High color depth, high gloss and brilliant brightness.**
- **Excellent printability.**
- **End-product compliant.**

Business Type: Exporter, Manufacturer & Supplier.

Primary Competitive Advantages:

- **Professionally managed organization.**
- **Young team of professionals.**
- **Modern machinery and excellent equipments.**
- **Superlative quality products.**
- **Cost effective solutions.**

Panorama Printing Inks

Our Products

Flexographic Inks:

We are counted as one of the most illustrious Solvent and Water - Based Flexographic Inks Manufacturers from India. We present high quality **Flexographic Inks** that are utilized for:

- Flexo inks for Polypropylene, Polyethylene, HMHD and LDPE, BOPP, BOPET, PVC surfaces.
- Flexo inks for HDPE/PP/PE woven-treated or untreated sacks.
- Flexo inks for HDPE/PP/PE woven-treated or untreated laminated sacks.
- Flexo inks for Pesticide Packaging.
- Flexo Water based inks for a wide range of paper substrates including corrugated boxes.
- ARSR, Deep Freeze and Heat Resistant Flexo Inks for requisite application.

Solvent Based Inks:

- **HDPE inks for:**
 - Laminated/ Unlaminated surfaces.
 - Woven & Unwoven surfaces.
- **Deep freeze inks for:**
 - Milk pouches.
 - Oil/ Ghee pouches.
 - Cheese pouches.
- **Oil Resistance Inks.**
- **Fat Resistance Inks.**
- **Heat Resistance Inks.**
- **Inks for UNTREATED surfaces.**

Water Based Inks for

- Tissue Paper.
- Kraft Paper for corrugated boxes.
- LDPE/Plastics.

Panorama Printing Inks

Screen Printing Inks:

We offer the finest quality **Screen Printing Inks** that is used in variety of printing industries. High printing quantity and long-lasting impression are the chief characteristics features that make our inks highly demanded by the customers. We manufacture:

- **Inks used on Plywood.**
- **PVC Gloss Inks.**
- **PVC Matt Inks.**
- **Paper Gloss Inks.**
- **Paper Matt Inks.**
- **Textiles.**
- **HDPE containers.**
- **Rubber.**
- **ABS.**

UV Inks:

UV inks act like liquid plastic. As the ink is exposed to concentrated UV radiation, a chemical reaction takes place during which the photo-initiators cause the ink components to cross-link into a solid. No material is removed so nearly 100% of the delivered volume is used to provide coloration.

U.V. PRODUCTS:

- **UV flexographic Inks.**
- **UV offset Inks.**
- **UV rolls coating Inks.**
- **UV screen printing Inks.**
- **UV pad printing Inks.**
- **UV adhesives (Glue).**

Panorama Printing Inks

Rotogravure Inks:

If you are looking for premium quality **Rotogravure Inks**, then we are the perfect destination for you. We bring forth superior quality Rotogravure Printing Inks that is used in varied printing industries.

- Gravure Heat Resistant (HR) inks for BOPP/Polyester/Polypropylene substrates.
- Gravure inks for various olefinic, polyethylene and polypropylene substrates.
- Gravure lacquer inks for Metalized polyester (Transparent inks).
- ARSR, Deep freeze resistant, Fat resistant, Masala resistant gravure inks.
- Gravure Lamination inks with high bond strength for Polyester and BOPP substrate.
- Gravure Heat Resistant inks for pharmaceutical packaging in both glassine paper and aluminum foil.
- Gravure GIP twist-wrap inks for confectionary packaging.

Solvent Based Inks:

- **Deep freeze inks for**
 - Milk pouches
 - Oil/ Ghee pouches
 - Cheese pouches
- **Oil Resistance Inks**
- **Fat Resistance Inks**
- **Heat Resistance Inks**
- **Inks for UNTREATED surfaces.**
- **Pharmaceutical Inks for**
 - Aluminum Foil
 - Glass
 - Paper
- **Heat Sealable Lacquers**
- **Transparent Lacquer shades for metalised polyester**

Water Based Inks for

- **Chromo Art Paper**
- **LDPE / Plastics**

Panorama Printing Inks

Non Woven Inks:

We are one of the foremost manufacturers of **Non Woven Inks** which are fabricated in compliance with ISO 9001:2008 quality standard.

We specialize in providing Inks for Non Woven fabric. Our range of **non woven inks** is widely accepted by **Flexo, Screen & Offset machines**. We can successfully provide water & solvent based inks for Flexo process which is a testimony of our rich proficiency in providing inks for non woven fabric.

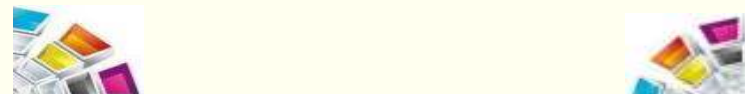

Our non woven inks are renowned for:

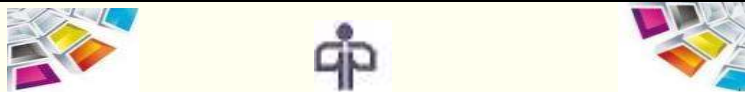

Excellent Printability, Excellent adhesion properties, High Strength (high print density), Strong flexibility, Good Scuff resistance, Excellent Crinkle resistance, Good water - resistance properties, Superb Heat Resistance properties & Good Deep Freeze properties.

Pad Printing Inks:

Are you in search of high quality **Pad Printing Inks**? We assure to serve you in the best possible way.

Pad Printing Inks are utilized as for the purpose of Labeling and marking. Known for its high printing quality and inerasable impression are the reasons due to which printing ink is widely recommended by our customers.

Panorama Printing Inks

Polyester Ink:

Polyester Inks are used to print self treated polyester films of different microns thickness. These Inks are specially formulated with Vinyle based resin system which gives very good adhesion properties on the substrates.

Reverse Lamination Inks:

We offer top quality grade **Reverse Lamination Inks** which are fabricated of premium quality raw material in compliance with international standard. The collection is characterized with excellent adhesion properties and an excellent gloss and depth ness. We also ensure of maintaining consistencies in every batch supplies for our entire range. The PVC inks find application for PVC shrink sleeves, twist wraps and film.

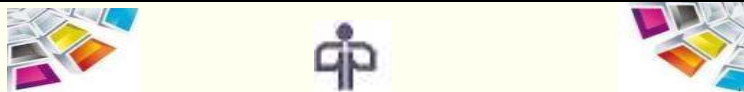

PVC Inks:

PVC Ink is extensively used in packaging industry. Mainly used for reverse printed non lamination application on flexible films.

Night Glow Inks:

Glow inks can be used in many transparent or translucent media, such as plastic, paint, glaze, ink, glass, printing slurry etc. to produce luminous products. It can be widely used in emergency signs, pass way signs, switches, enamel nameplate, road signs, toys, handicraft, clock, meter panels, textile, firemen's equipment, military & camp instruments etc.

Panorama Printing Inks

Textile Inks:

Textile Inks offered by us have excellent resistance build-up and possess high quality printability. Textile inks are used to print various fabrics like:

- Cotton fabric.
- Blended cotton fabric.
- Polyester fabric.
- Nylon fabric etc.

These ranges are supplied in various colors with special effects.

Plastisol Inks:

Plastisol inks (both solvent and water based) are used in textile screen printing.

Surface Coatings:

Panorama Printing Inks has a wide range of **Roller coatings, Spray Coatings, Textile coatings, Ink receptive Coatings** that Decorates and protects substrates such as metals, synthetic elastomers, rubbers, plastics, ceramics and wood which is utilized in Electronic industries, Automobile industries, Packaging and various other industries.

Auxiliary & Ancillary Products:

- FRP Toners.
- Stain Glass Toners.

Panorama Printing Inks

End Application

Tissue Papers & Napkins	Milk Pouches
Corrugated Boxes	Ghee pouches
Cement Bags (Paper)	Wall Papers
Woven Sacks (Plastic)	Gift Wrappers
Net & Foam Bags	Textiles
Packing Materials	Adhesive Tapes
Bakery Items Packaging	Labels
Greetings & Wedding Cards	Stickers
Toilet Soap & Detergent Packaging	Sign Boards
Glass & Ceramics	Banners
Toffee Wrapper	Text Books
Plastic Components	Business Forms
Metal Components	Cables
Rubber Components	Magazines
Stationary Items	News Papers
Shoes & Slippers	Calendars
Brochures & pamphlets	Gas Cylinders
Chewing Tobacco Pouches	Decorative
Foils - Tablets & Capsules	Items, etc.,
Packaging	
Tins, Drums & Cans	
Plastic Carry Bags
