E-WHEEL BARROW APPLICATIONS

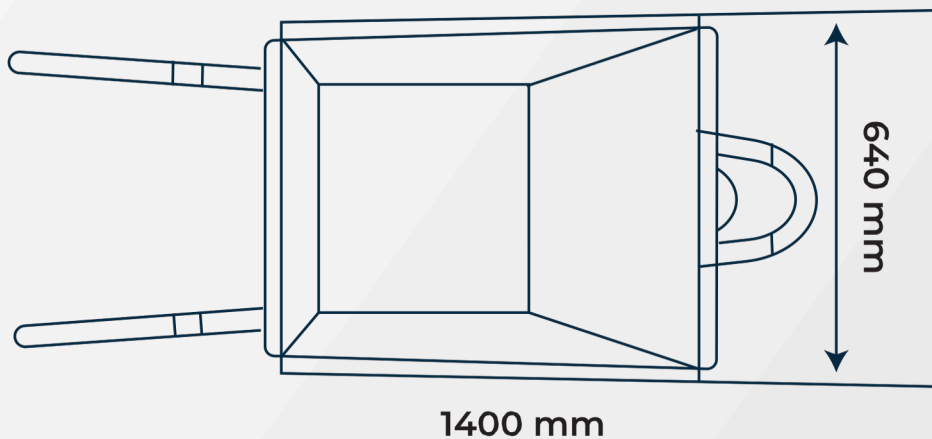

KEY FEATURES AND ROI

Our electric wheelbarrow can carry a weight of **60-70 kg** which is more than three times the maximum load that an average human can carry (20 kg)

Some benefits of using the electric wheelbarrow include **less fatigue, better ergonomics, less time consumption, less workload and more cost-effectiveness.**

The electric wheelbarrow can be used in various industries such as **construction, warehouses, foundries, agriculture and in transporting construction materials.**

E-WHEEL BARROW ROI

More convenient and efficient than manual operation

Carry up to 3x the load capacity, as compared to 1 manpower

1 person + Electric wheelbarrow is equivalent to 3 manpower, which leads to a saving of two manpower.

RoI achieved as early as 5 weeks.
