

Three Phase Air Operated Double Diaphragm Pump

Product Description

The **Three Phase Air Operated Double Diaphragm Pump** is a powerful industrial pump made of mild steel. Available in different sizes and grey color, this pump has a flow rate of **1000 LPM** and is suitable for various industrial applications. With its air-operated double diaphragm design, this pump offers smooth and consistent flow even in tough working conditions. Its compact and lightweight design makes it easy to install and operate. This pump is built to withstand high-pressure operations and can handle a wide range of fluids and chemicals. Overall, the Three Phase Air Operated Double Diaphragm Pump is a reliable and efficient pump for industrial use.

Product Specifications

Specification	Details
Product Name	Three Phase Air Operated Double Diaphragm Pump
Material	Mild Steel
Flow Rate	1000 LPM
Color	Grey
Design	Air Operated Double Diaphragm
Application	Industrial Use
Size	Available in Different Sizes

Frequently Asked Questions (FAQs)

Q: What is the material used to make this pump?

A: The Three Phase Air Operated Double Diaphragm Pump is made of mild steel.

Q: What is the flow rate of this pump?

A: This pump has a flow rate of 1000 LPM.

Q: What is the color of this pump?

A: This pump is available in grey color.

Q: Is this pump suitable for industrial use?

A: Yes, this pump is specifically designed for industrial use.

Q: What is the design of this pump?

A: This pump has an air-operated double diaphragm design that offers smooth and consistent flow even in tough working conditions.
