

SILICONE ARTIFICIAL FINGER

Product Description & Frequently Asked Questions

PRODUCT DESCRIPTION

The Silicone Artificial Finger is made from flexible, skin-friendly silicone. It is designed as a portable, customised finger prosthetic for people who need an artificial replacement for a missing finger. Its lightweight construction makes it convenient to handle and store. The silicone material is water-insoluble and designed for durability with appropriate care. Fit, appearance and suitability may vary by individual, so professional assessment is recommended.

FREQUENTLY ASKED QUESTIONS (FAQs)

Q: What material is this product made of?

A: It is made of silicone, a flexible material designed to be skin-friendly.

Q: Can this product be recycled?

A: Silicone products are not generally accepted in standard household recycling. Check local disposal guidance.

Q: Is this product soluble in water?

A: No. Silicone is not soluble in water.

Q: Is this product disposable?

A: Please confirm with the supplier whether the specific model is reusable or disposable before use.

Q: What is this product used for?

A: It is intended as a cosmetic finger prosthesis for personal use. A qualified provider can advise on fit, care and suitability.
