## About Us

Active Chemicals is a well-known entity in the chemical solutions market, dedicated to offering quality products to multiple industries. Through the business model of trader, supplier, and exporter, the company handles an array of advanced water treatment chemicals, disinfectants, and bleaching agents that serve the dynamic needs of industrial, municipal, healthcare, sanitation, textile, and paper industries. Offering vast products like lion stable bleaching powder, a1 bleaching powder, hi-strength bleaching powder, lion bleaching powder drum, puri chlor hi-grade bleaching powder, poly aluminium chloride powder, and rensa calcium hypochlorite, the company promises optimal performance with every dispatch.

Complemented by a commitment to unwavering quality, each formulation is developed to high-performance standards, high dissolution rates, and compatibility with apparatus treatment systems. From pool chlorination stabilization to hospital sanitation enhancement, each solution addresses special operational and environmental demands made by high-demand, high-volume industries. Technical assistance and application advice provide customers with maximum return on investment. Environmental stewardship concepts are woven into manufacturing and packaging processes, supporting green values while ensuring reliability in use. With scalable supply capacity and tailor-made packaging, the business is well-equipped to meet varied needs with accuracy and ease of use.
