

Sticky Mat

Specification of Sticky Mat :

- Dust Control sticky mats for easy removal of dust contaminants from the foot soles & trolley wheels.
- Over 99% of viable/non viable contamination entering critical area increases product yield and reduces consumables costs.
- No out gassing, non-toxic.
- Multi layered clean film full adhesive layers from mats that effectively capture dirt and dust from foot traffic and equipment wheels before they enter the controlled environment.
- Each of the numbered layers of the mat peels off easily to reveal a new clean surface, Independent testing shows that floor mats represent the most effective particle reducing system for significantly reducing traffic borne contaminants, removing up to 95% of particles at the 30 micron range. An Acrylic adhesive is used which does not support microbial growth.
- Size – 2feet X 3 feet (30 Mats in one Pad)
