## About Us

Relief Power Control Panel is motivated by the mission of empowering industries and commercial establishments with dependable and smart electrical solutions. Being a nature of business: manufacturer, supplier, and service provider, the company provides high-performance power control systems for efficiency, safety, and sustainability for the long term. Whether it is maximizing power distribution using well-planned electrical power distribution panels or maximizing energy utilization through APFC control panels and variable frequency drive panels, the objective remains the same, to achieve maximum operation continuity at minimized energy losses.

From MCB distribution panels to three-phase control panels, each product is custom-designed from best-quality materials, guaranteeing long-term dependability even under extreme conditions. Service solutions such as electric cable tray installation and electrical cable tray installation are performed with technical proficiency and a customer-focused strategy. Effective space-saving designs, advanced fault protection, and easy integration make every solution suitable for industrial and commercial networks. Compliance with engineering excellence can be noticed in products such as the MS distribution box and earth leakage panel, designed according to industry standards but facilitating ease of maintenance and ensuring safety.

OEM Service Provided	No

## Our Products

**Industrial Plc Control Panel**

**Three Phase Changeover Control**

**Kanku Filling Machine Control Panel**

**LT Distribution Panel**

**Electric Control Panels For Boilers**

**Auto Changeover Control Panel**

**Automatic Changeover Panel**

**Mild Steel Fully Automatic Control**

**Steam Boiler Panel**

**MS Electric Boiler Control Panel**

**Single Phase PLC Control Panel**

**Three Phase Power Control Center**

**Plc Automation Control Panel**

**Bottle Capping PLC HMI Control Panel**

**Vfd Control Panel**

**Automatic Pipe Bending CNC Machine**
